PRESS RELEASE

New-generation cooling: The innovative V-ZUG CombiCooler

Made in Switzerland and incorporating the innovative PureCool technology, the new CombiCooler V4000 is spacious and will keep everything beautifully cool. The brilliant MonoFridge function turns the freezer compartment into a normal refrigeration section in just a few hours – so you can decide how you want to use your CombiCooler.

Thanks to a unique refrigeration circuit, PureCool technology delivers cutting-edge cooling innovations. Incorporating this technology, the CombiCooler V4000 has even achieved an A+++ -10% rating, making it one of the most energy-efficient fridges on the market.

Two become one

Are you planning a party and want to refrigerate as many drinks as possible? Or do you only really need the freezer compartment in the summer for ice cubes and ice cream? Perhaps you are renting a place with a CombiCooler and you don't actually need a freezer compartment at all? Then you can use the MonoFridge function, which is like waving a magic wand to turn the freezer compartment into a normal refrigeration section within just a few hours – giving you even more space for your fresh groceries.

No defrosting – no ice buildup

The NoFrost feature saves you the tedious job of defrosting the freezer compartment, while ClimateControl stops any ice building up at the back of the refrigeration section. Your food is also kept optimally fresh thanks to minimized temperature differences and reduced humidity.

Even more convenient

To top it all off, this brilliant appliance is extremely user friendly, incorporating an innovative ClickShelf system that makes changing shelf heights even easier because they simply click into place. What's more, for only a small increase in the amount of electricity used, you can switch on the SilentPlus mode to reduce noise to a minimum.

Network ready

Your CombiCooler is fitted with a Wi-Fi module as standard, so you can network your appliances with ease and benefit from the many advantages of V-ZUG Home. When you first start up your appliance, you will be taken on an interactive tour of how your fridge works and you can input the initial settings effortlessly. The app will help you with the everyday operation of your fridge and send you handy tips, and you can easily switch special functions on and off, such as SilentMode or fast cooling. And a particularly useful feature: the app will tell you if the fridge door is not shut correctly.

About V-ZUG

V-ZUG is the leading Swiss household appliances brand and has its head office in Zug. For over 100 years, the company in the heart of Switzerland has been developing and producing innovative kitchen and laundry appliances which make everyday life easier while inspiring and delighting users – for a lifetime of enjoyment. V-ZUG has 10 display and advice centres and 16 service centres in Switzerland and is represented internationally in 18 countries. The company has around 1,400 employees worldwide and trains over 70 apprentices. As the market leader in Switzerland, in addition to pursuing its own business operations V-ZUG is also committed to improving the economy, society and the environment. Together with its sister company Gehrig Group AG and subsidiary SIBIRGroup AG, the owner-operated company belongs to the Metall Zug group.

About Metall Zug

Metall Zug is a Swiss industrial holding company with its head office in Zug and offers a wide range of innovative and sustainable premium and precision products. The group is a technology leader and develops, produces and distributes appliances, machines and solutions through its household appliances, infection control and wire processing business units. The Metall Zug group consists of V-ZUG AG, Gehrig Group AG (Household Appliances Business Unit), the Belimed group (Infection Control Business Unit) and the Schleuniger group (Wire Processing Business Unit). The industrial holding company grew out of the metalwork company Metallwarenfabrik Zug which was established in 1887, and is still primarily owned by the founding family. The Metall Zug group employs around 3,600 people worldwide and is listed on the SIX Swiss Exchange.
