

Swiss perfection for your home

Planning aid

Kitchen appliances

2015

Note on content

Please note

This planning aid applies to the specified model numbers only. Older planning aids for earlier generation models may be requested in electronic form from our Customer Services.

This planning aid is not to be used as installation instructions! The regulations and instructions binding for the appliance installation are to be obtained from the installation instructions packed with the appliances. The installation instructions can also be downloaded from the internet from www.vzug.com/b2b.

Modifications

Text, diagrams and data correspond to the technical standard of the appliances at the time this planning aid went to press. The right to make technical modifications for the purpose of the further development of the appliances is reserved.

Symbols used

Denotes important safety precautions.

Failure to observe said precautions can result in injury or in damage to the appliance or fittings!

► Indicates an instruction.

• Indicates a list.

Information and precautions that should be observed.

Supplementary documents

In this planning aid, occasional reference is made to supplementary documents. These documents can be requested from the Head Office in Zug by sending an e-mail to service-support@vzug.com.

1 Overview of connections, ranges and dimensions

Electrical connections must be carried out by qualified experts in accordance with the guidelines and standards for low-voltage installations and the specifications of the local electricity supply companies.

A plug-in appliance may only be connected to a socket outlet with earthing contact, installed according to specifications. An all-pole mains isolating device with 3 mm contact opening should be provided in the house wiring system. Switches, plug and socket devices, circuit breakers and fusible cut-outs which are accessible after installation and which have all-poles switching are permissible as isolating devices. Effective earthing and separately installed neutral and earth conductors ensure safe and fault-free operation. After installation, live parts and cables with basic insulation must not be accessible. Check old installations.

Electrical connections must be carried out by qualified experts.

Plan a separate inlet for the electrical connection for each appliance.

1.1 General operating conditions

Detailed information on the electrical connection data can be found at the beginning of each section.

Value	Nominal value	Minimum	Maximum
Voltage	230 V 400 V	207 V 360 V	253 V 440 V
Frequency	50 Hz sinusoidal	49 Hz sinusoidal	51 Hz sinusoidal

Short duration frequency variation in the mains: $\pm 5\%$

Long duration frequency stability in the mains (for synchronous clocks): $\pm 10\text{ ppm}$

The appliances are designed for use up to a max. altitude of 2000 m above sea level.

1.2 Use of residual current devices (RCDs) in domestic installations / fault currents

High fault currents are inherently present in cookers, ovens and hobs. The values are influenced by various factors and can vary widely. Fault currents of up to approximately 10 mA per appliance are permissible in accordance with the norm. The values are measured at the operating temperature.

If residual current devices are provided for in the domestic installation, we recommend that the above-mentioned appliances have their own residual current device, separate from the rest of the power supply to the living unit. 30 mA or higher should be selected as the tripping current for the residual current device.

1.3 Validity

The product family (model number) corresponds to the first alphanumerics on the identification plate.

1.4 Positions of electrical connections

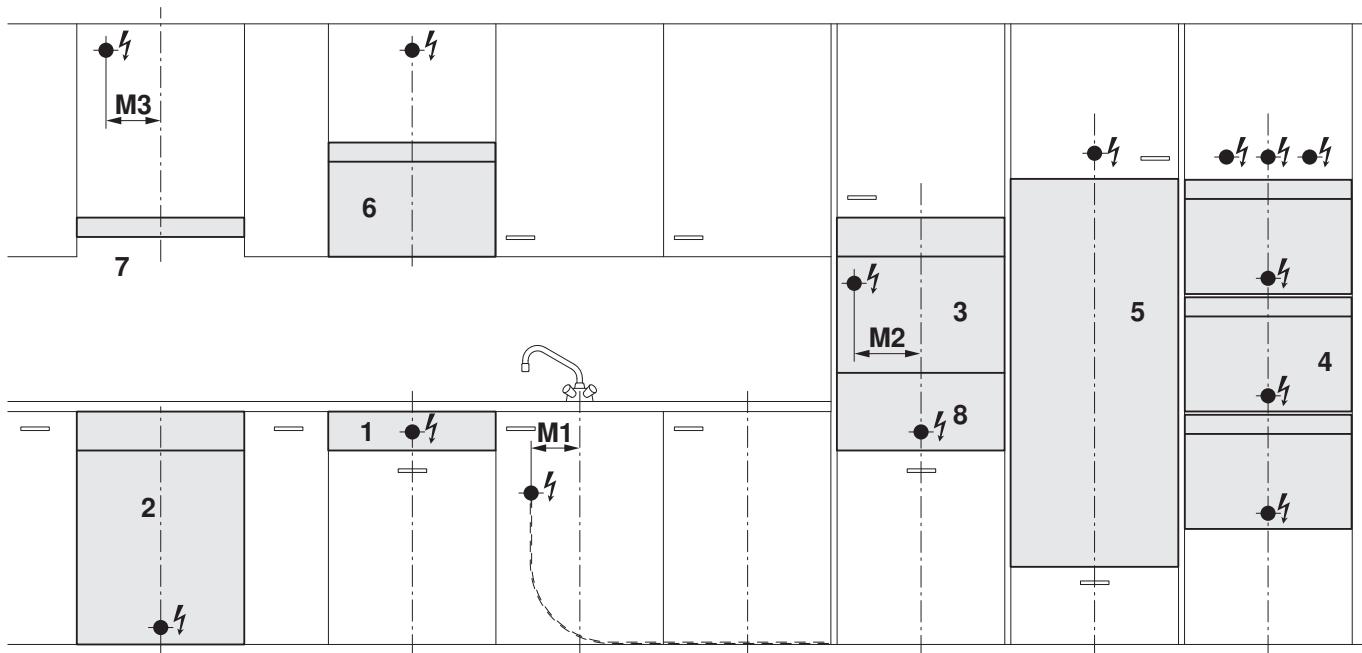

For EURO kitchens, allowance from the floor can vary. In this case, the electrical connection should be calculated using the dimension from the bottom edge of the appliance.

Oven above an oven

With this combination, an electrical connection should be provided for each appliance. Depending on the installation height and the type of combination, the connections may be located at different heights.

Wall hoods with telescopic casing

The electrical connection must pass between the exhaust air piping and the lagging sheets. The measurements given in the table ensure that this condition is met.

- 1 Wide switch box / control box / autarchic hob
- 2 Refrigerator in base unit / dishwasher
- 3 Oven/coffee-center
- 4 Combinations (oven / steam cooker / microwave)
- 5 Refrigerator in tall unit
- 6 Microwave in a wall unit
- 7 Range hood
- 8 Warming drawer

M1 Distance from centre to dishwasher/refrigerator connection in base unit

M2 Distance from centre to coffee-center connection

M3 Distance from centre to range hood connection

Provide additional clearance for electrical connections if the niche has only the minimum depth.

1.5 Built-in EURO

No.	Designation	Connection from appliance support	Connection in niche	Type of connection
1	Oven, steam cooker (height 600 mm)	max. 30 mm (plinth height 100 mm)	Centre	I
2	Control box, autarchic hob	–	Centre	A, I

	D, F	220-240 V~ 50 Hz					

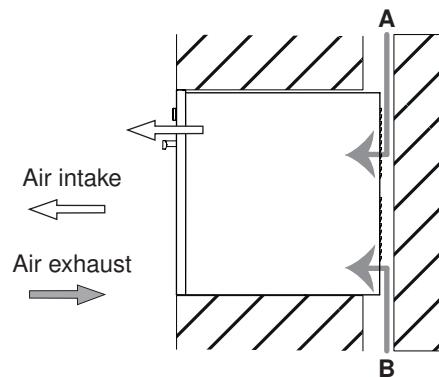

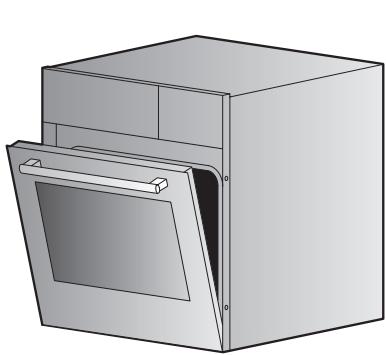

* Country group (see page 2)

** The Combi-Steam MSLQ can also be operated with a single-phase connection (230 V~ / max. 16 A). For performance reasons, however, it is to be connected with a two-phase connection or fitted with a 25 amp fuse whenever possible.

3.2 Air circulation diagram for Combi-Steam MSLQ

 For proper ventilation, prepare appliance niche with an air intake, positions **A** and **B**, of at least 80 to $\leq 850 \text{ cm}^2$ in total, where **B** has to account for at least 60 cm^2 .

Installation below an Induktionskochfeld (see page 48).

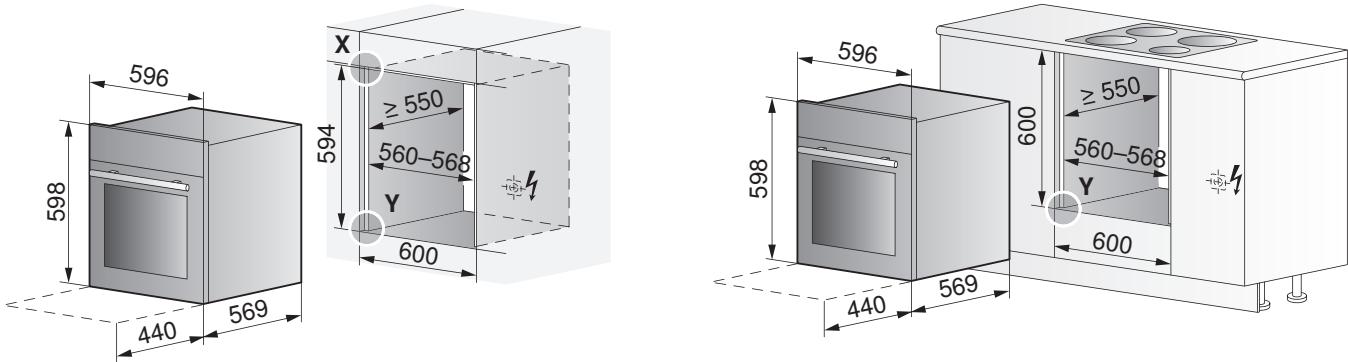

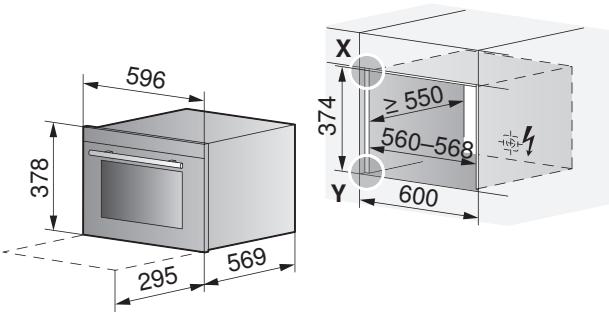

3.3 Combi-Steam MSLQ (23015)

Below second appliance

Depth > 555 mm

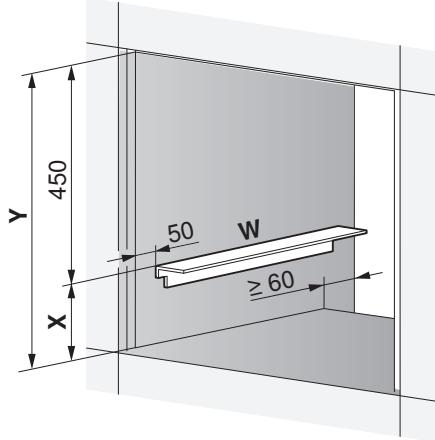

Above second appliance

Depth > 575 mm

Above warming drawer

Depth > 555 mm

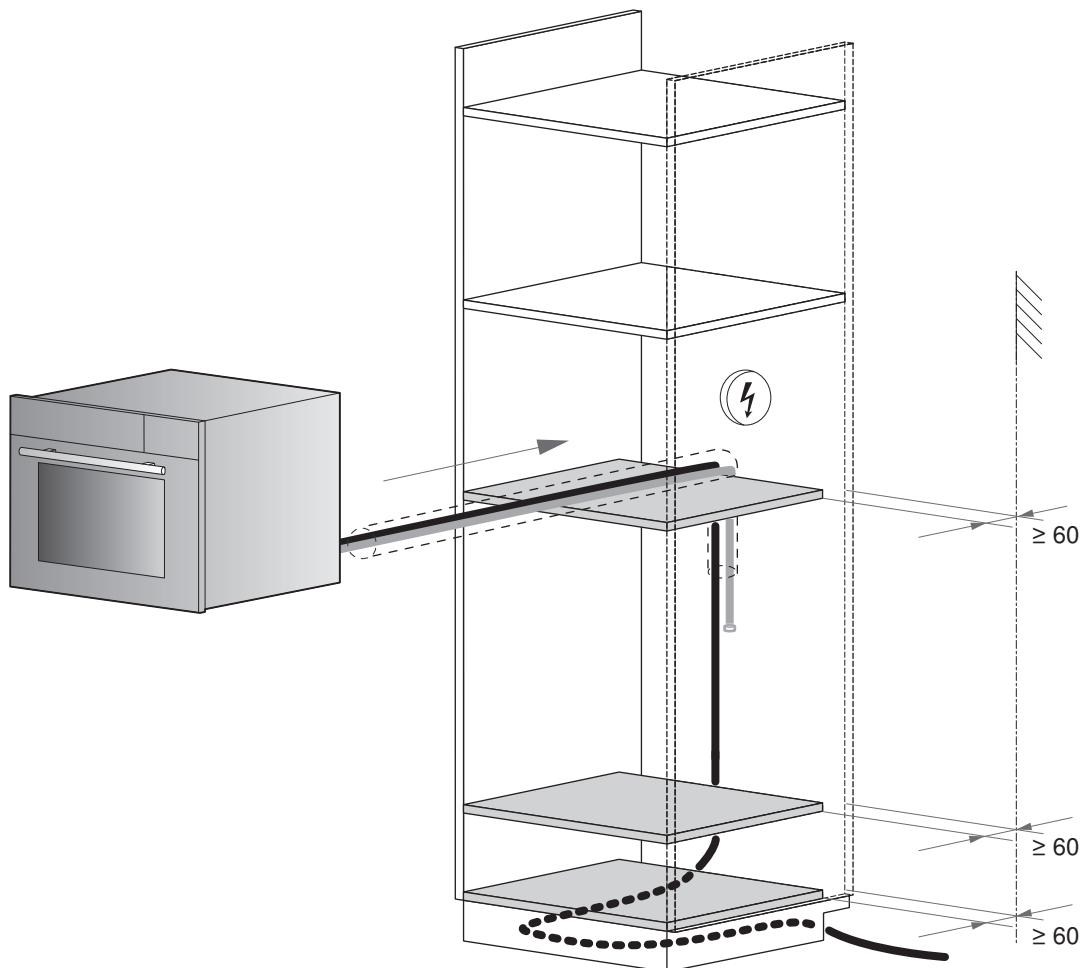

X = Height of second appliance

Y = Niche height

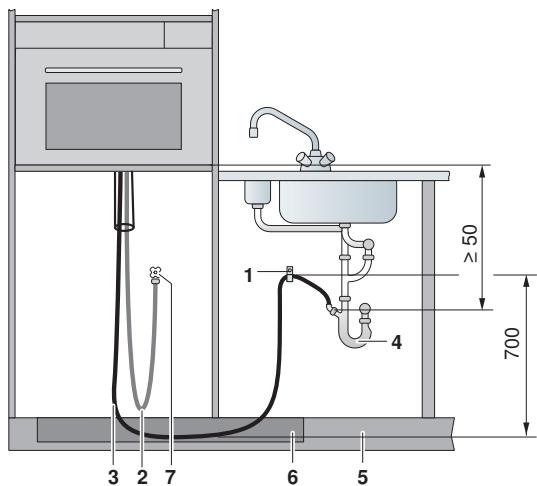

W = Angle set K20198

For an installation depth under 575 mm, it is recommended that the appliance be installed below other appliances for space reasons.

If installing with a second appliance in the same niche, use the angle set 60 **W** (K20198).

**Installation**

Plumbing in

1 Hose clamp

2 Reinforced inlet hose 2 m, G ¾"

3 Drain hose 3 m, internal diameter of connection 22 mm

On-site installations

4 Siphon

5 Plinth panel

6 Hose fed through plinth

7 Cold water connection with stop-cock

Drain

Length of drain hose: 3 m

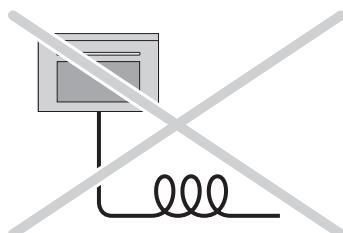

The hose clamp must be mounted at a height of 700 mm (see illustration above).

The drain hose may be neither lengthened nor shortened.

The distance from the bottom of the appliance to the drain trap must be at least 50 mm.

The drain hose must be laid flat without any kinks.

Cold water connection inlet

Operating pressure: 0.1–1.0 MPa (1–10 bar)

Only use if water hardness > 3° French hardness (> 1.7° German hardness).

Length of reinforced hose: 2 m

Local water authority regulations must be observed.

Existing hoses that are defective must be replaced.

The reinforced hose may not be lengthened.

The stop-cock must be accessible at all times.

4 Microwaves

Minimum installation height (child safety): Keep 850 mm distance from the floor to the bottom edge of the microwave!

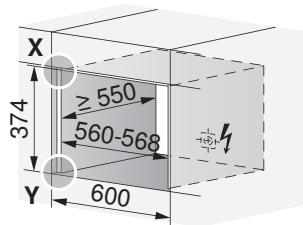

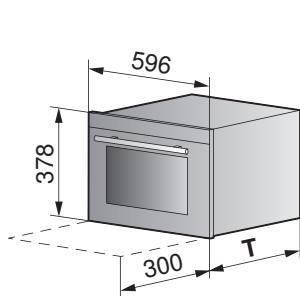

The mounting angles are not included in the scope of delivery. Order angle set K50572 at the same time.

4.1 Electrical connection data

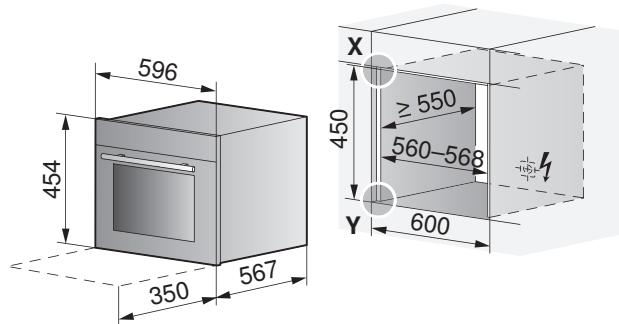

Appliance	Mains connection	Fuse	Connection cable	Mains cable
Miwell-Combi XSL	230 V~ 50 Hz	16 A	2800 W	1.2 m, without plug

8 Glass ceramic hobs – induction, wok, teppanyaki

8.1 General notes

It is imperative for induction hobs to have adequate ventilation (see sections Installation without protective plate (see page 44) and Installation with protective plate (see page 46)).
This is guaranteed with a worktop depth of 20 mm to 40 mm

If a drawer is installed directly underneath, a protective plate is recommended in the vicinity of the mains cable and to protect the ventilation openings. The protective plate set can be used (see Accessories (see page 119)).

With a front-facing air gap of 3 mm, a ventilation protective plate with seal is essential (Installation with protective plate (see page 46)).

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The layout of the hobs to be installed may differ from the hobs illustrated here!

Dear Customer

This planning aid contains the dimensions of all our current glass ceramic hobs.

Since April 2013, most of the **flush** induction hobs require larger cut-out dimensions and other corner radii. If you own an appliance which was manufactured before April 2013, please make sure that you do select the correct cut-out dimensions.

The cut-out dimensions for flush induction hobs can be found in section Glass ceramic hobs for the replacement market (see page 58).

Some replacement appliances with the previous dimensions are still available upon request.

Thank you for reading this information.

Your V-ZUG Ltd

8.2 Electrical connection data

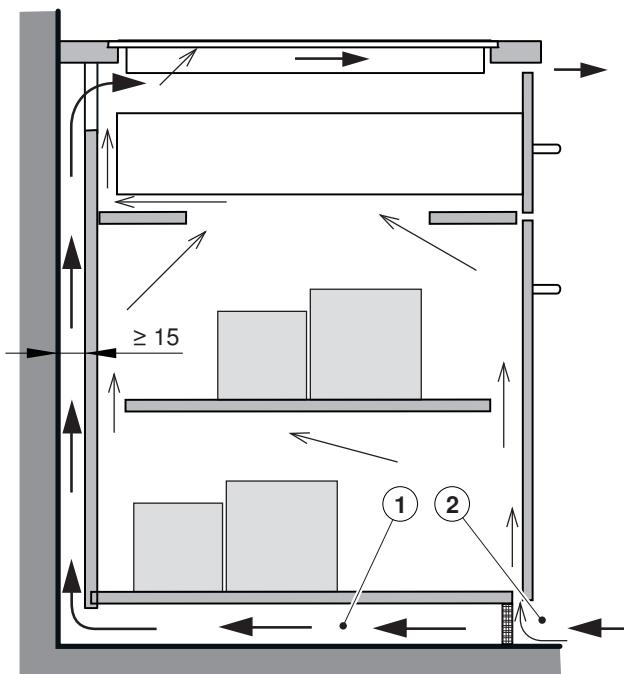

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
GK16TIWS.1F	A, B, C, D, E, F	220-240 V~50/60 Hz	16 A	3000 W	1.7 m, without plug

	A, E	380-415 V 3N~ 50/60 Hz	16 A	11100 W	
	B, C, D, F	220-240 V~50/60 Hz	48 A		

* Country group (see page 2)

8.3 Ventilation

To ensure good ventilation, there must be ≥ 17.5 mm of space under the appliance.

1. The rear panel of the floor unit must be open around the work surface cut-out in order to guarantee continuous air circulation via the ventilation slits.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.
2. Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. So that enough cool air can be drawn in, there must be a continuous supply of fresh air circulating till outside the cabinet.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.

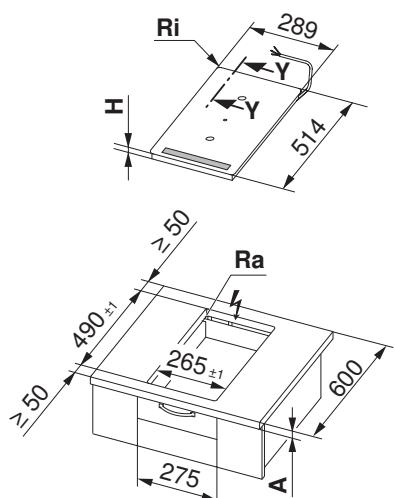

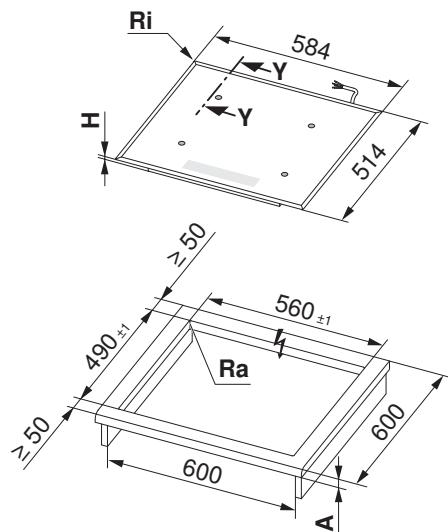

8.4 Framed installation

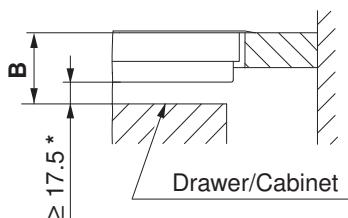

Aim for corner radii of cut-out: ≤ 10 mm.
Corner radii of appliance: 8 mm

8.6 Installation without protective plate

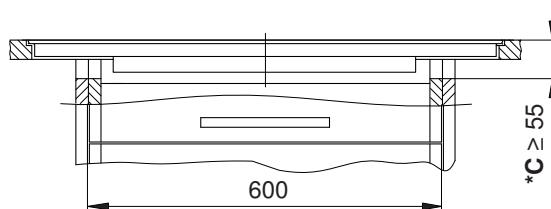

Requirements for optimal ventilation:

- a front-facing air gap of ≥ 5 mm
- a space of ≥ 17.5 mm in height beneath the appliance
- a worktop depth of ≥ 20 mm to ≤ 40 mm
- a supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob.

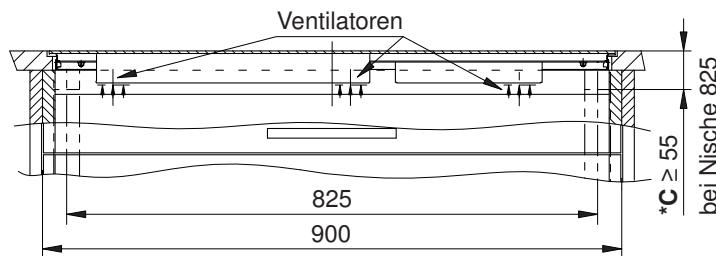

GK26TI ..., GK36TI ..., GK37TI ..., GK46TI ...

GK46TIABS ..., GK46TIAKS ..., GK46TIMXS ..., GK46TIMAS ...

GK56TIMS ...

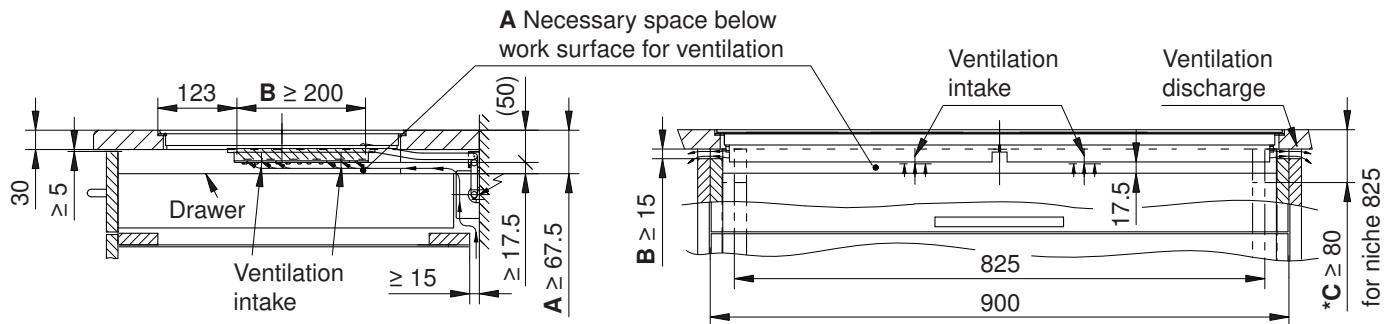

* Required for flush appliances

A Necessary space below the worktop for the ventilation of the appliance

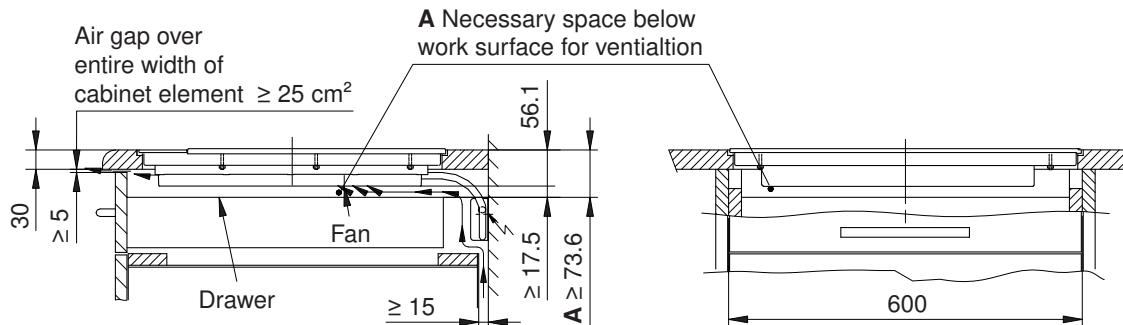

C Cut-out in side walls for disassembly from below, only for flush version

GK46TIPS ..., GK46TIMPS ..., GK47TIMPS ...

GK16TIYS.1F, GK26TIYS.1F

* Required for flush appliances

A Necessary space below the worktop for the ventilation of the appliance

B Cut-out in the side walls left and right for the ventilation of the appliance

C Cut-out in the side walls for disassembly from below, only for flush version

8.7 Installation with protective plate

For more information, see section Accessories (see page 119).

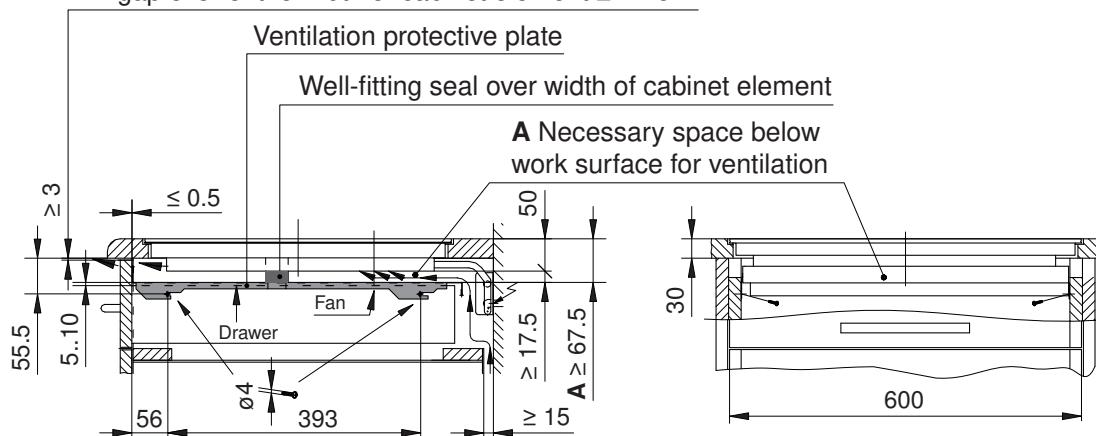

Requirements for optimal ventilation:

- front-facing air gap of ≥ 3 mm (with protective plate)
- distance of ≥ 17.5 mm between protective plate and ventilation opening
- worktop depth of ≥ 20 mm to ≤ 40 mm
- a supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob

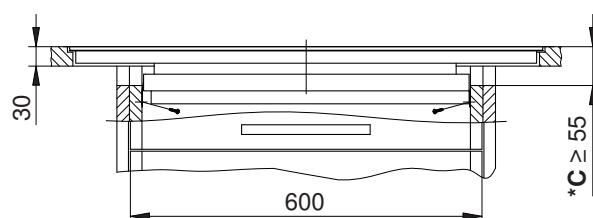

A protective plate cannot be installed with induction hobs that have dial controls.

GK26TI ..., GK36TI ..., GK37TI ..., GK46TI ...

Air gap over entire width of cabinet element $\geq 17 \text{ cm}^2$

GK46TIABS ..., GK46TIAKS ..., GK46TIMAS ..., GK46TIMXS ...

C Cut-out in side walls for disassembly from below, only for flush version

8.8 Installing above oven / steam cooker

It is not intended that a Combi-Steam MSLQ with construction type 60-600 be installed.
It is not intended that an oven be installed below the following hobs: GK46TIMPS..., GK46TIPS..., GK56TIMS...

Type of construction: 60-600

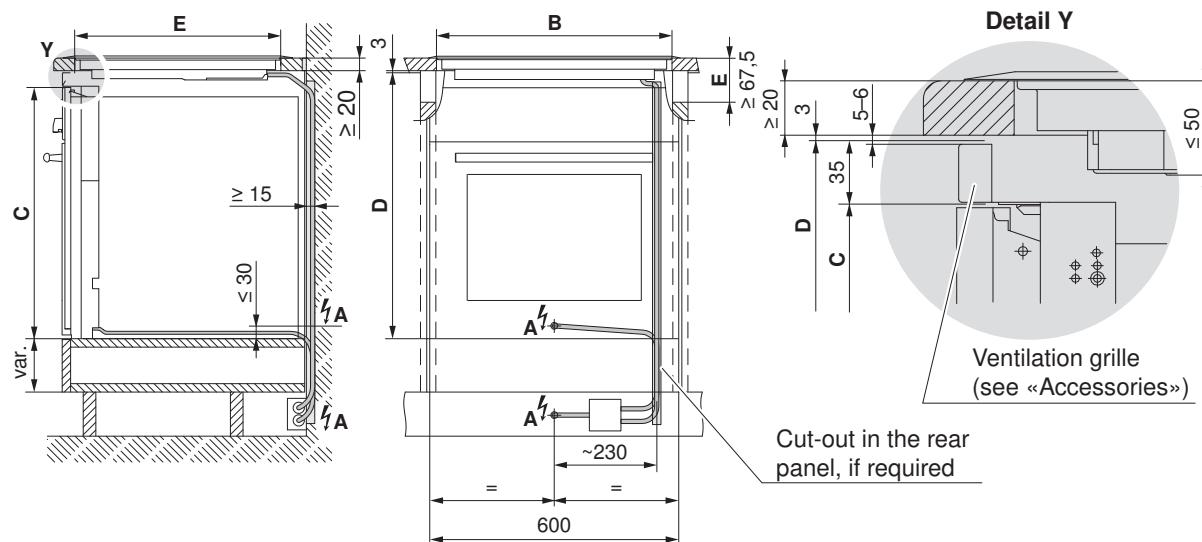

With the use of a ventilation grille (see section Accessories (see page 119))

Type of construction 60-381: Combi-Steam HSL, Steam HSE, Combair HSE

Type of construction 60-450: CombiSteam XSL, Combair XSL, Combair XSE

Type of construction 60-600: Combair-Steam SL, Combair-Steam SE, Combair SLP, Combair SL, Combair SEP, Combair SE

- A** Possible mains supply connections
- B** Mounting cut-outs
- C** Appliance height: 59.8 cm (type of construction: 60-600), 37.8 cm (type of construction: 60-381), 45.4 cm (type of construction: 60-450)
- D** Niche height: 63.5 cm (type of construction: 60-600), 41.6 cm (type of construction: 60-381), 45.0 cm (type of construction: 60-450)
- E** Cut-outs in side walls for hobs larger than niche width

9 Toptronic glass ceramic hobs

9.1 General notes

The distance between the underside of the hob tray and any part of the cabinet beneath that is made of combustible material must be ≥ 20 mm. The distance from the hob cut-out to flammable walls (left, right and rear) must be ≥ 50 mm, for flush mounted ≥ 41.5 mm, for GK45TEPSF ≥ 55 mm.

If a drawer is installed directly underneath – and if the tray can be reached from below without the aid of tools – a guard must be used. The thermal shielding plate set (see Accessories (see page 119)) is recommended for this purpose.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The layout of the hobs to be installed may differ from the hobs illustrated here!

Dear Customer

This planning aid contains the dimensions of all our current glass ceramic hobs.

Since April 2013, most of the **flush** Toptronic hobs require larger cut-out dimensions and other corner radii. If you own an appliance which was manufactured before April 2013, please make sure that you do select the correct cut-out dimensions.

The cut-out dimensions for flush Toptronic hobs can be found in section Glass ceramic hobs for the replacement market (see page 58).

Some replacement appliances with the previous dimensions are still available upon request.

Thank you for reading this information.

Ra Outer corner radii of cut-out

GK46IDF (95A), GK46TIMSF (88A)

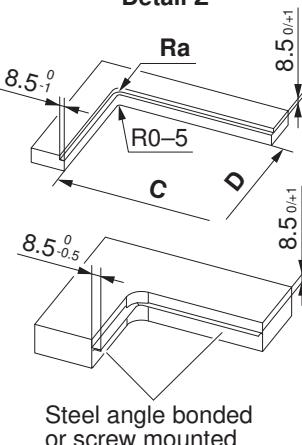

GK46IABDF (96A), GK46TIABSF (028)

Y - Y

Detail Z

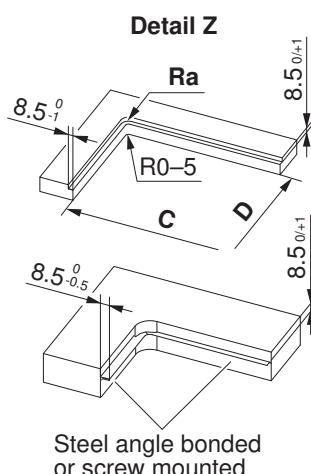

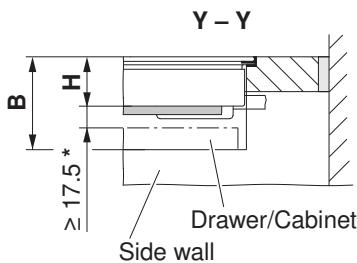

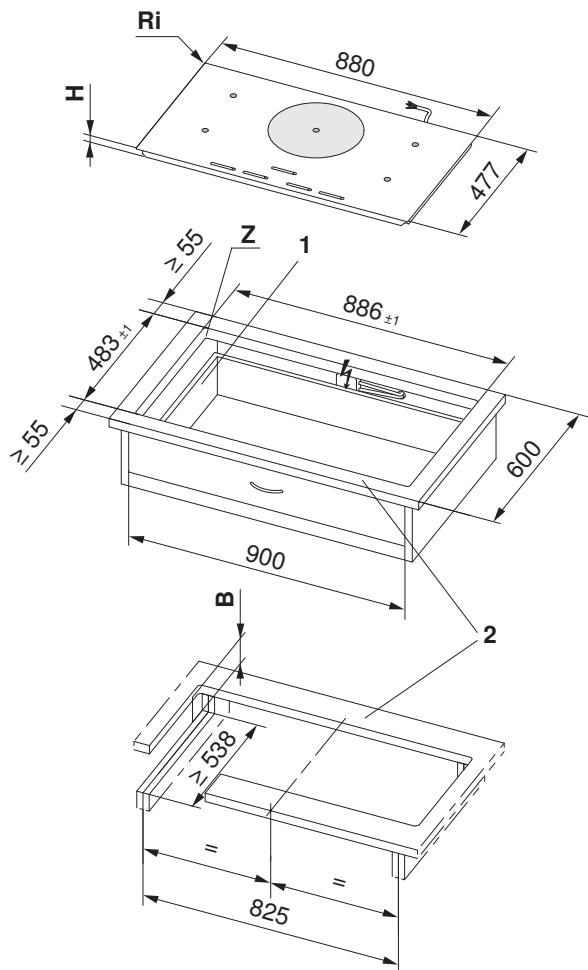

* The required clearance must be observed!

Appliance	A Depends on producer	B	C/D	H	Corner radius Ra/Ri
GK46IDF, GK46TIMSF	$\geq 30 \text{ mm}$	$\geq 75 \text{ mm}$	536/466 mm	51.7 mm	14/11 mm
GK46IABDF, GK46TIABSF			726/466 mm	50.0 mm	

- A** Worktop depth (only applies in combination with directly built-under oven / steam cooker with type of construction 60-600, without Combi-Steam MSLQ)
- B** Necessary clearance for service requirements
- H** Measurement from the top side of the worktop to the underside of the hob (ventilation openings)
- Ri** Corner radii of appliance
- Ra** Outer corner radii of cut-out
- 1** For symmetrical installation, it is not necessary to cut out the side walls.

GK56TIMSF (89A)

* The required clearance must be observed!

Appliance	A Depends on producer	B	C/D	H	Corner radius Ra/Ri
GK56TIMSF	≥ 30 mm	≥ 75 mm	869/466 mm	53.3 mm	5/1.5 mm

- A** Worktop depth (only applies in combination with directly built-under oven / steam cooker with type of construction 60-600, without Combi-Steam MSLQ)
- B** Necessary clearance for service requirements
- H** Measurement from the top side of the worktop to the underside of the hob (ventilation openings)
- Ri** Corner radii of appliance
- Ra** Outer corner radii of cut-out
- 1** For symmetrical installation, it is not necessary to cut out the side walls
- 2** Front and rear struts are reinforced on the underside. The strut width is determined by the producer of the stone worktop. The minimum strut width can vary according to the property of the stone.

10.2 Appliances for the replacement market – Toptronic

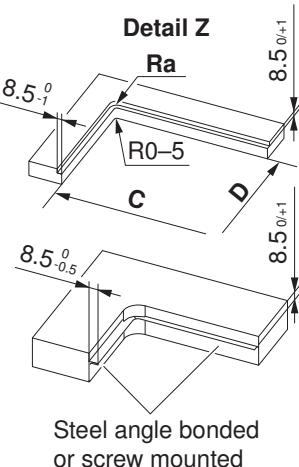

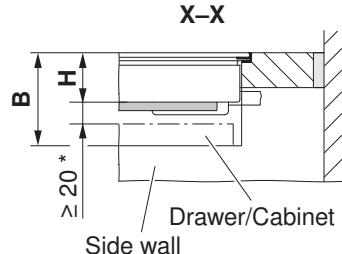

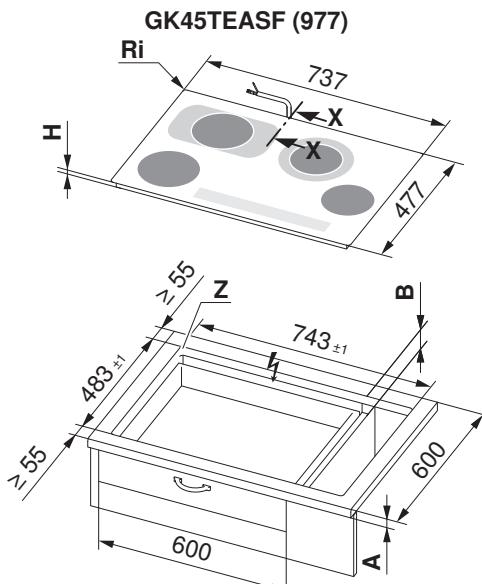

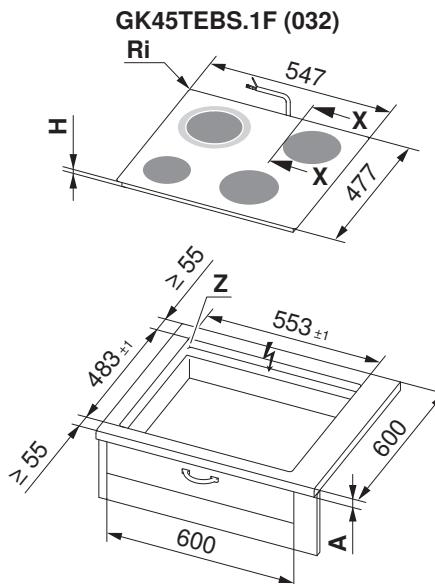

For general notes, electrical connection data and how to operate the appliance, see section Toptronic glass ceramic hobs (see page 49).

If a drawer is installed directly underneath – and if the tray can be reached from below without the aid of tools – an intermediate base must be used.

A width of 600 mm is recommended for the base unit.

Access to the hob from below must be guaranteed. For servicing, the hob control unit can be exchanged from below. Corner radii of appliance 11 mm

* The required clearance must be observed!

Appliance	A Depends on producer	B	C/D	H	Corner radius Ra/Ri
GK45TEBS.1F	≥ 30 mm	≥ 90 mm	536/466 mm	47.5 mm	14/11 mm
GK45TEASF			726/466 mm		

A Worktop depth (only applies in combination with directly built-under oven / steam cooker with type of construction 60-600, without Combi-Steam MSLQ)

B Minimum measurement in side wall area for disassembly of hob tray

H Measurement from the top side of the worktop to the underside of the hob tray

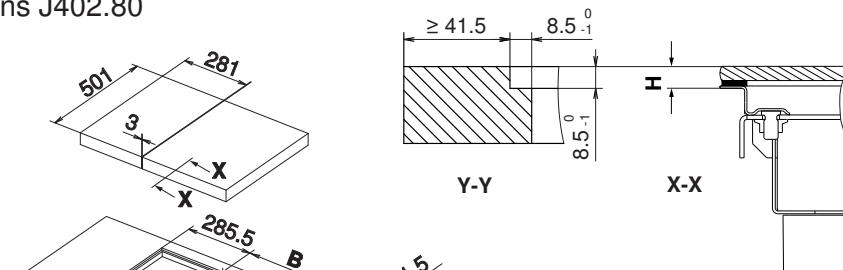

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

12 Gas hobs & lava grills

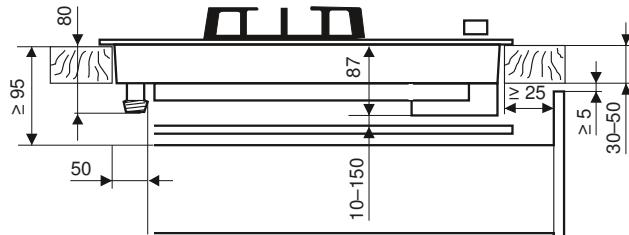

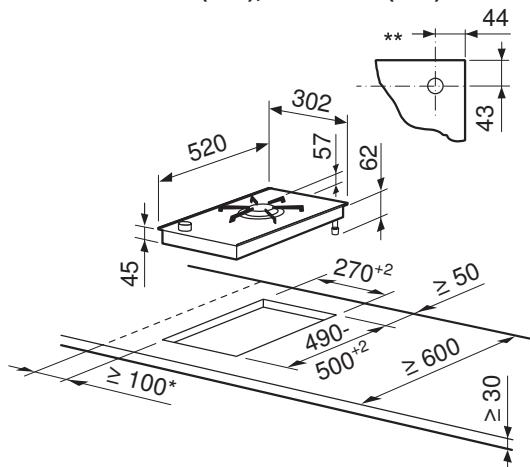

12.1 Gas hobs

When a range hood is installed above the gas hob, the minimum distance given for the particular range hood must be observed.

GK11TG (798), GK11TTG (851)

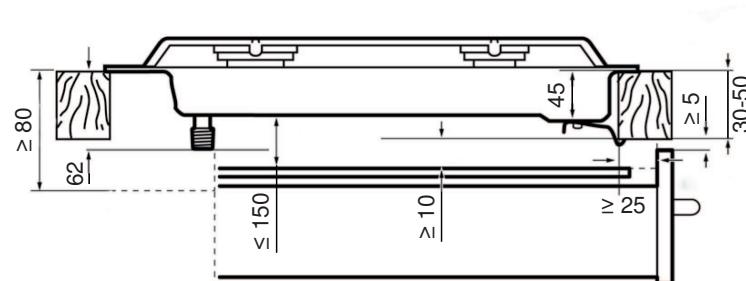

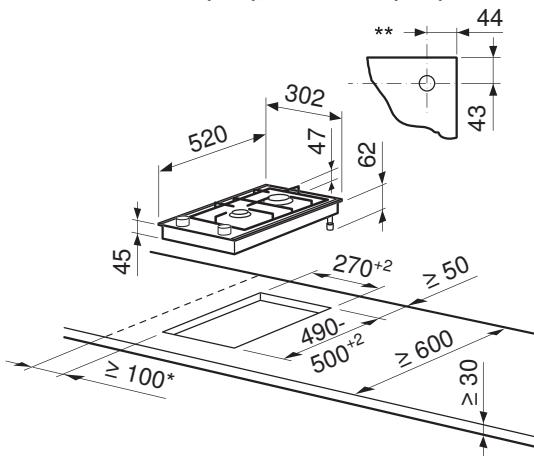

* Minimum distance from mounting cut-out to the wall

** Position of gas connection in cut-out

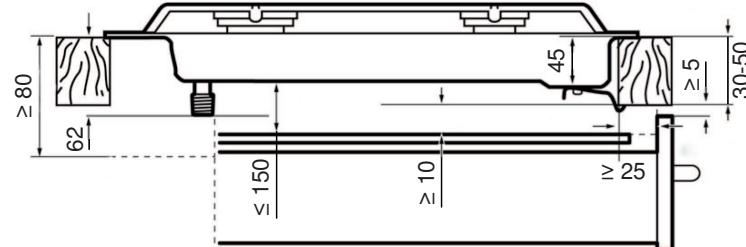

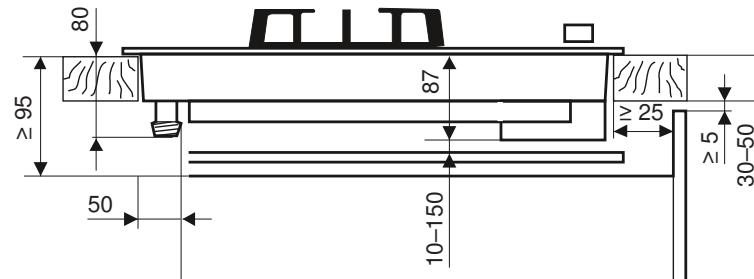

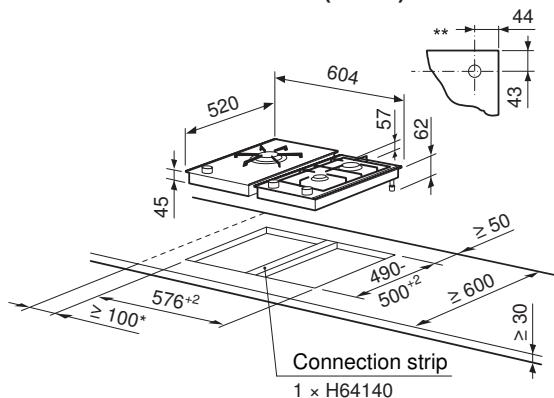

Appliance	Art. no.	Mains connection	Fuse	Rated load	Gas type	Connection cable	Country group ***
GK11TG	798.3.49	220-240 V~50/60 Hz	3 A	1 W	Natural gas H/E/(L) 20 (25) mbar	1 m, without plug	A, B, E
	798.3.69				Natural gas 1 kPa	1 m, AU plug	D
GK11TTG	851.3.89				Town gas G110 8 mbar	1 m, BS plug	B

*** Country group (see page 2)

GK21TG (797), GK21TTG (302)

GK1121TGCN (31035)

* Minimum distance from mounting cut-out to the wall

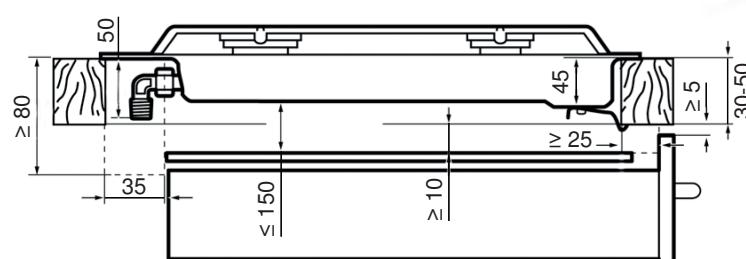

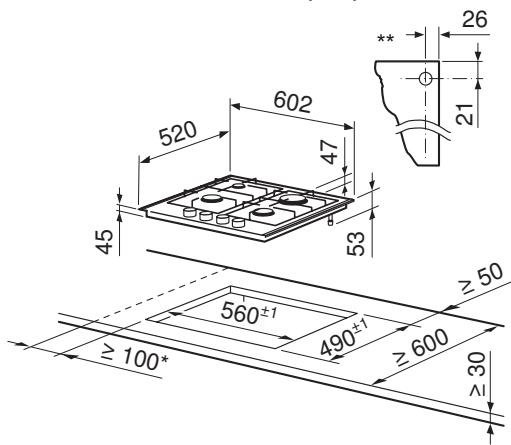

** Position of gas connection in cut-out

Appliance	Art. no.	Mains connection	Fuse	Rated load	Gas type	Connection cable	Country group ***
GK21TG	797.3.49	220-240 V ~50/60 Hz	3 A	1 W	Natural gas H/ E/(L) 20 (25) m- bar	1 m, without plug	A, B, E
GK21TTG	302.3.89				Town gas G110 8 mbar		B
GK1121TGCN	31035.67.200	220 V ~50 Hz			Natural gas H/ E/(L) 20 (25) m- bar	2 × 1 m, 2 × CN plugs	F

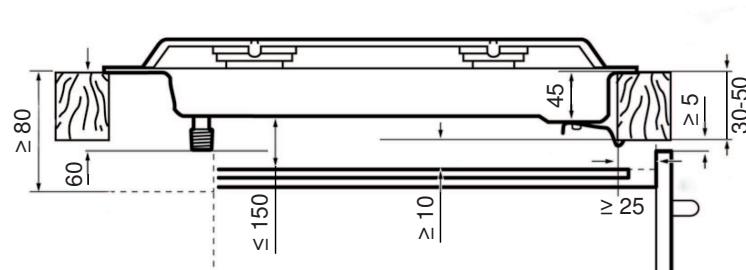

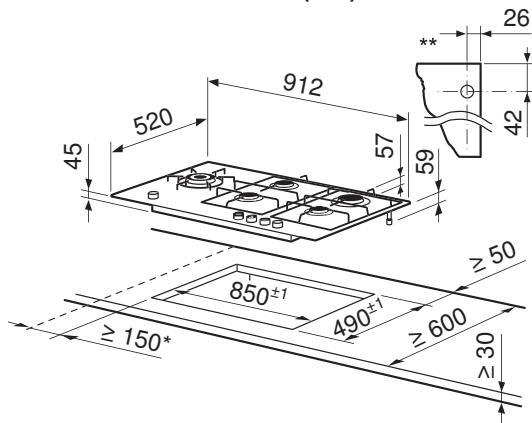

*** Country group (see page 2)

GK41TG (717)

GK51TPG (701)

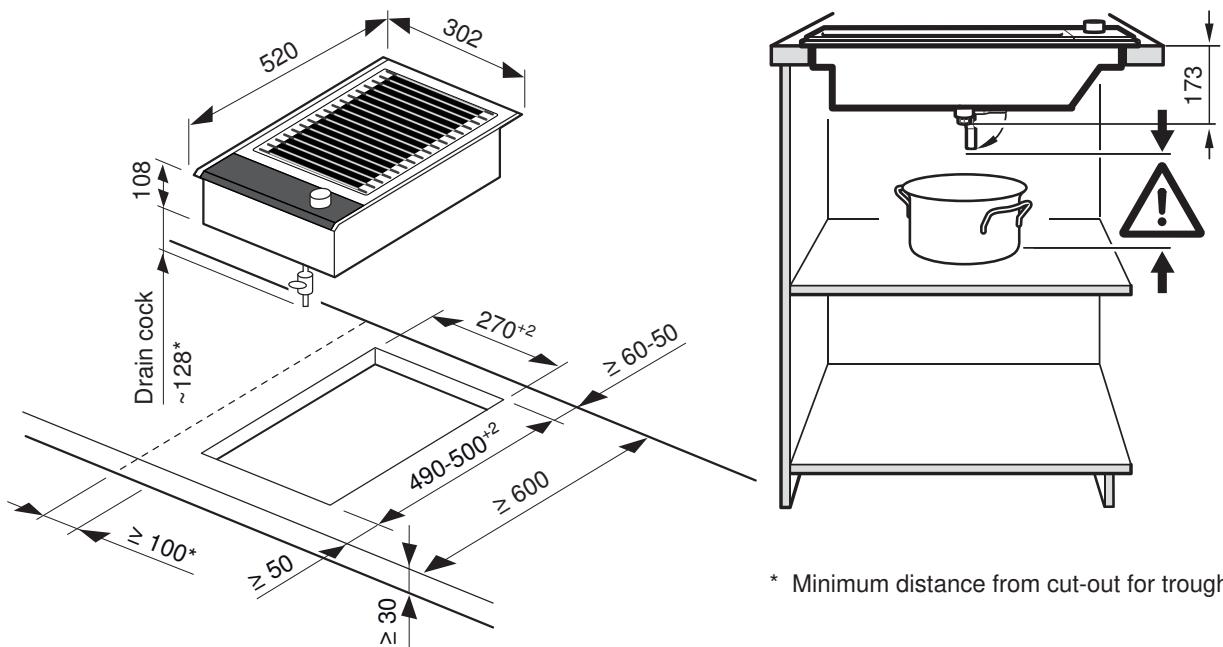

* Minimum distance from mounting cut-out to the wall

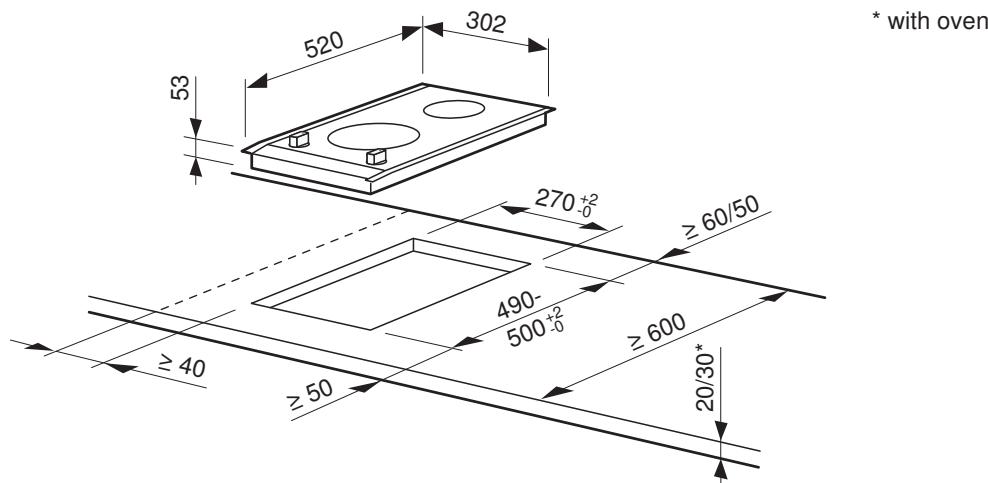

** Position of gas connection in cut-out

Appliance	Art. no.	Mains connection	Fuse	Rated load	Gas type	Connection cable	Country group ***
GK41TG	717.3.49	220-240 V~50/60 Hz	3 A	1 W	Natural gas H/E/(L) 20 (25) mbar	1 m, without plug	A, B, E

12.2 Lava grill, GK11TKLG (98A)

Appliance	Art. no.	Mains connection	Rated load	Mains cable	Connection cable	Country group **
GK11TKLG	98A.3.30	220-240 V~50/60 Hz	13 A	2400 W	1 m, without plug	A, B, E, F

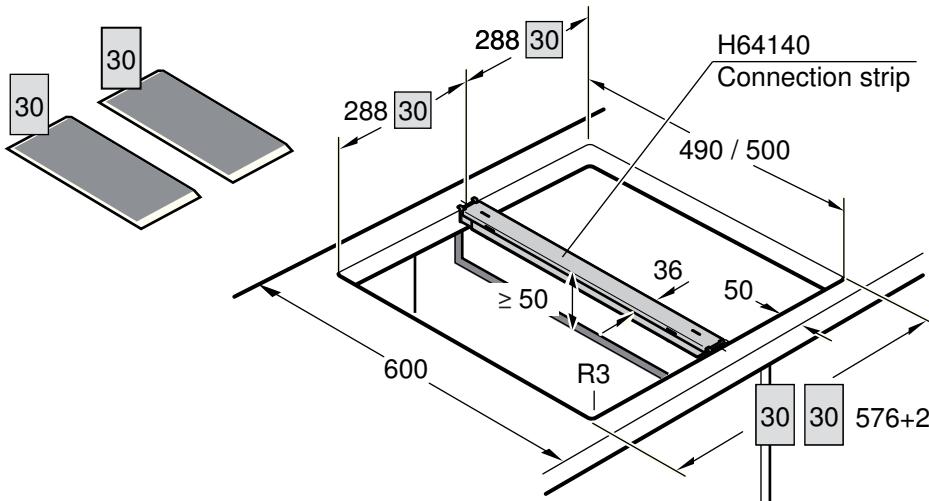

12.3 2-zone induction hob, GK21TI (834)

Appliance	Art. no.	Mains connection	Fuse	Rated load	Connection cable	Country group **
GK21TI	834.3.89	220-240 V~50/60 Hz	16 A	3700 W	1.1 m, without plug	A, B, E, F

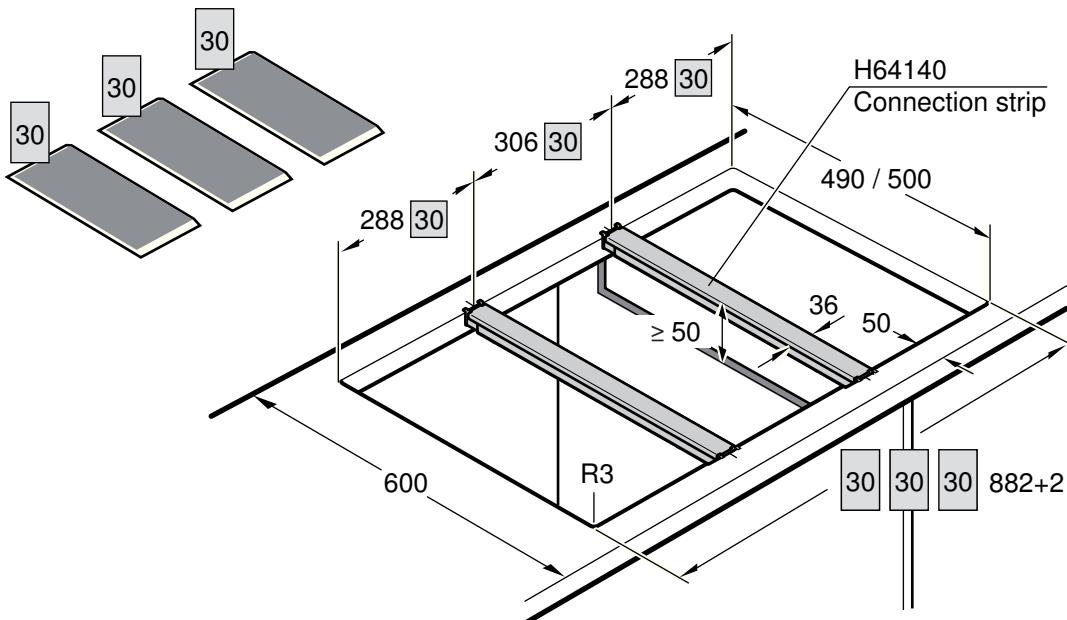

** Country group (see page 2)

12.4 Installation examples for combined gas edition arrangement

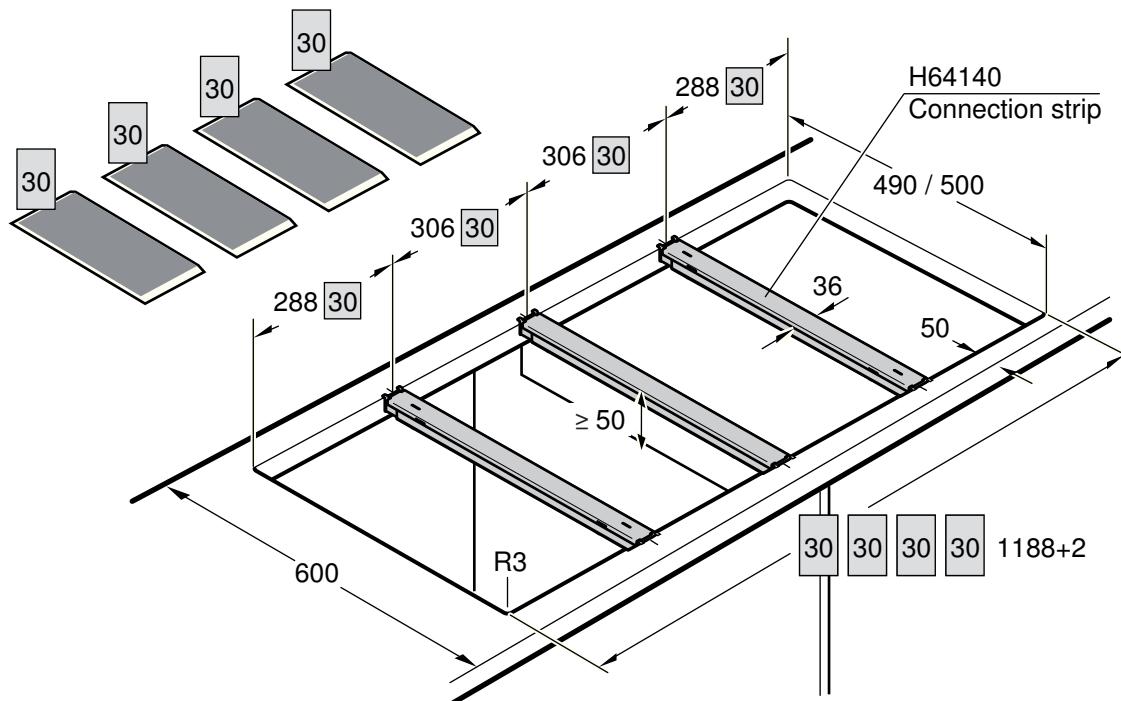

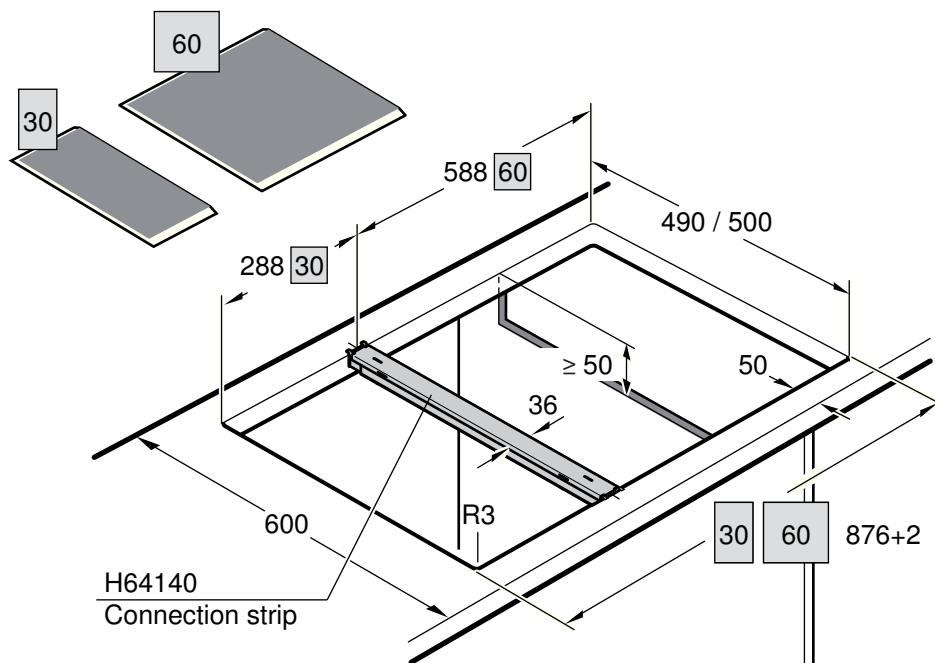

Arrangement A (1 × H64140)

Arrangement B (2 × H64140)

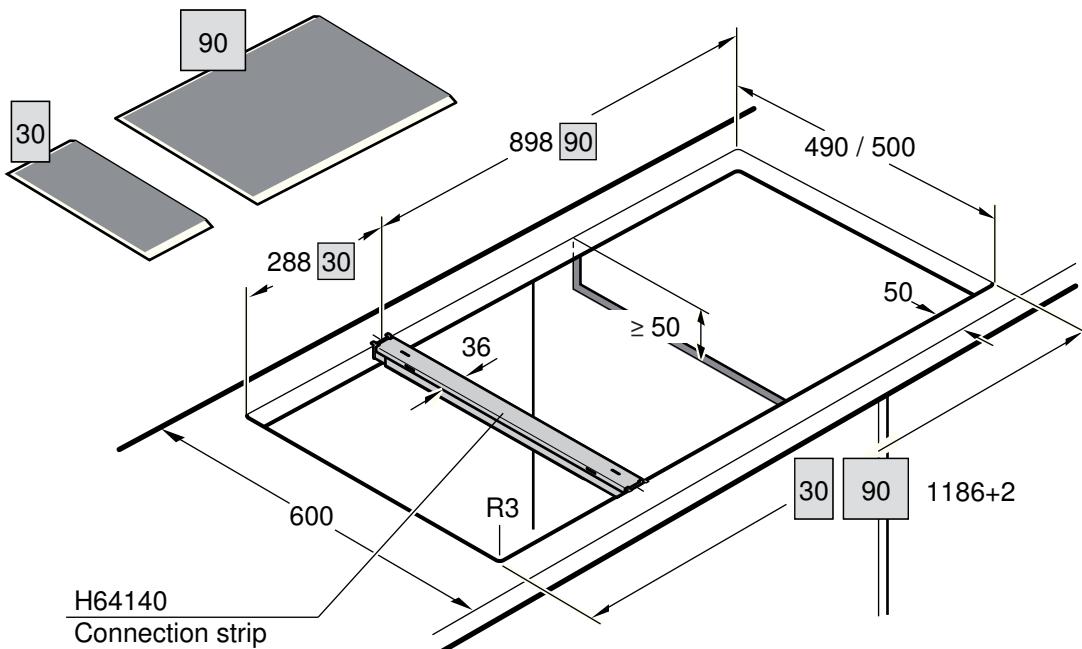

The connection strip H64140 is not included in the scope of delivery and must be ordered separately for a combined installation.

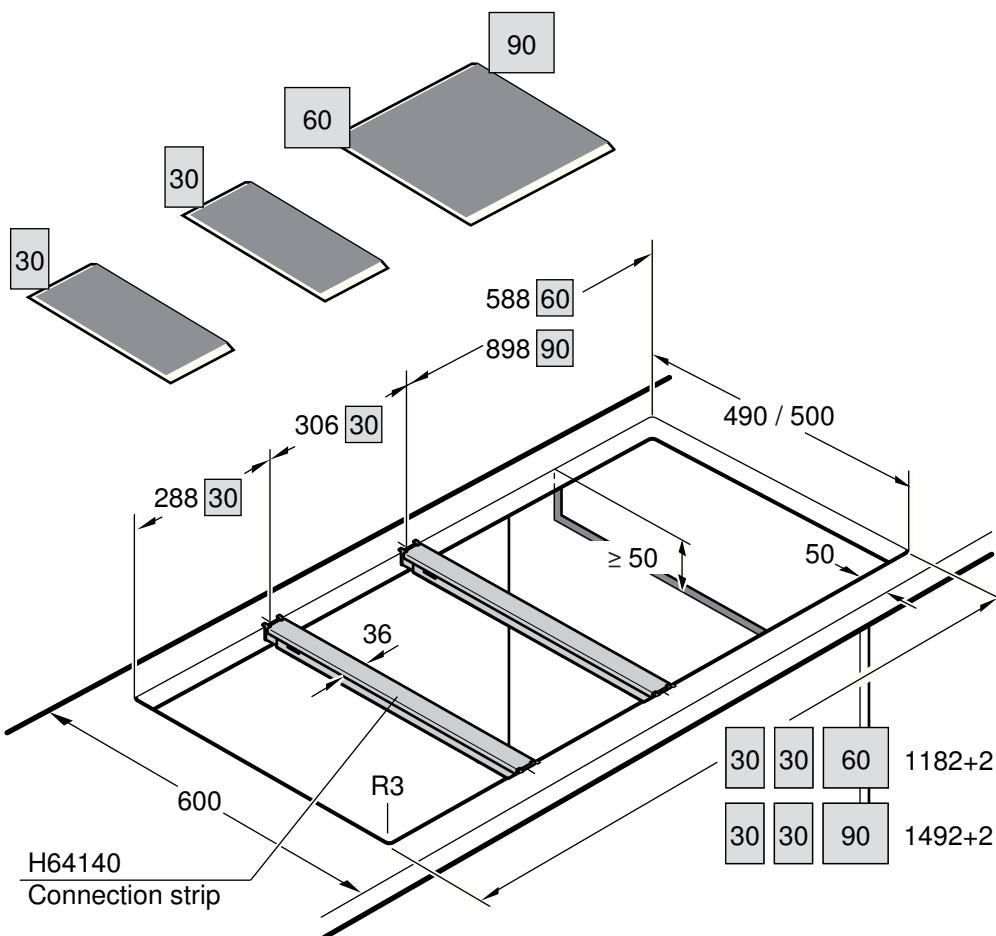

**Arrangement C (3 × H64140)****Arrangement D (1 × H64140)**

The connection strip H64140 is not included in the scope of delivery and must be ordered separately for a combined installation.

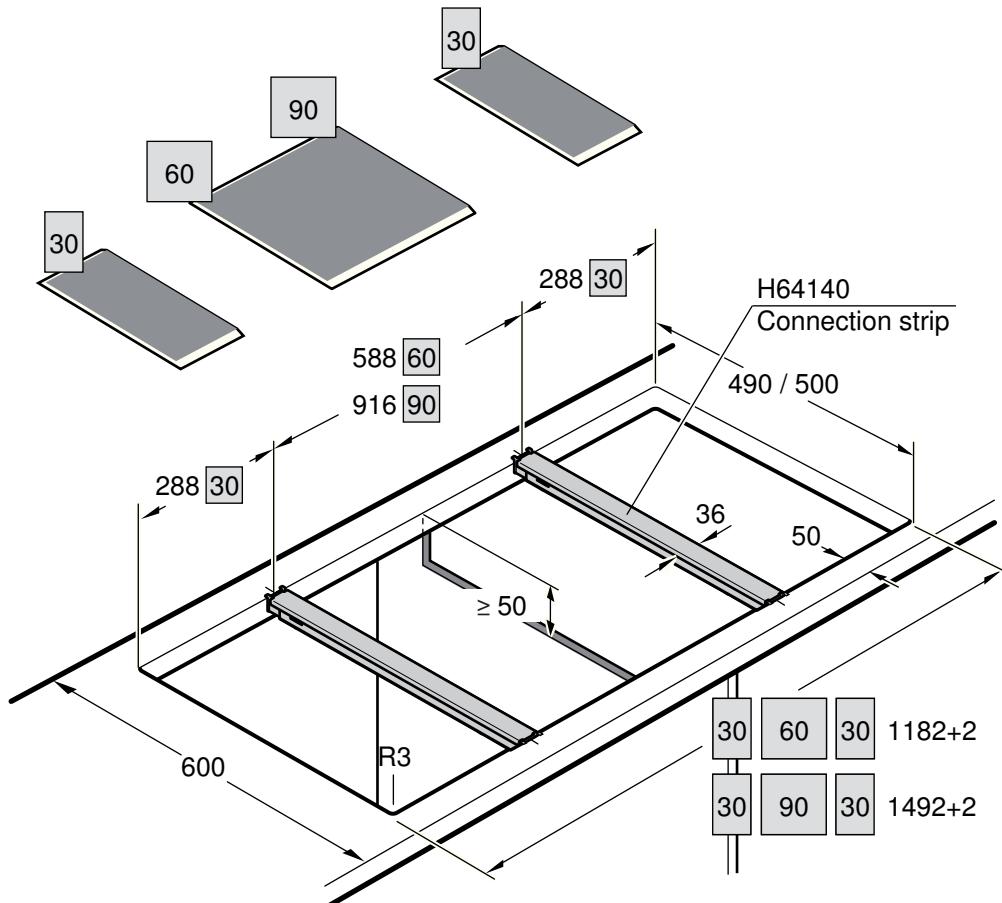

Arrangement E (1 × H64140)

Arrangement F (2 × H64140)

The connection strip H64140 is not included in the scope of delivery and must be ordered separately for a combined installation.

Arrangement G (2 × H64140)

The connection strip H64140 is not included in the scope of delivery and must be ordered separately for a combined installation.

13 Range hoods

Technical information on the range hoods can be found in the document J328.35 «TechInfo for range hoods» and the price list.

13.1 General notes

If other firing systems are being used at the same time (e.g. wood, gas, oil or coal fired heating appliances), safe operation is only possible providing a room negative pressure of 4 Pa (0.04 mbar) is not exceeded at the location of the appliance.

Risk of toxic fumes! An adequate flow of fresh air must be guaranteed e.g. via non-closable openings in doors or windows and in combination with an air-intake/exhaust-air wall box or by other technical means.

If the appliance is installed over gas hobs, each cooking zone must be fitted with an ignition fuse and the minimum distances (see «Distance above hob») must be adhered to.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

Extraction mode

The extracted air must not be fed into a chimney which is used for exhausting fumes from appliances burning gas or other fuels.

Observe the local fire regulations.

Installation notes

- In addition to the correct dimensioning of the exhaust duct, it is also necessary to ensure a sufficient inflow of fresh air.
Exhaust air needs fresh air.
- Avoid routing the exhaust duct to the side through the flue casing.
- Planning features for non-destructive de-installation and maintenance of the appliance:
 - Do not route telescopic casing in suspended ceilings.
 - Avoid silicon joints between the telescopic casing and the appliance.
 - All plastering, plasterboarding, wall papering or painting work is to be carried out prior to installing the appliance.

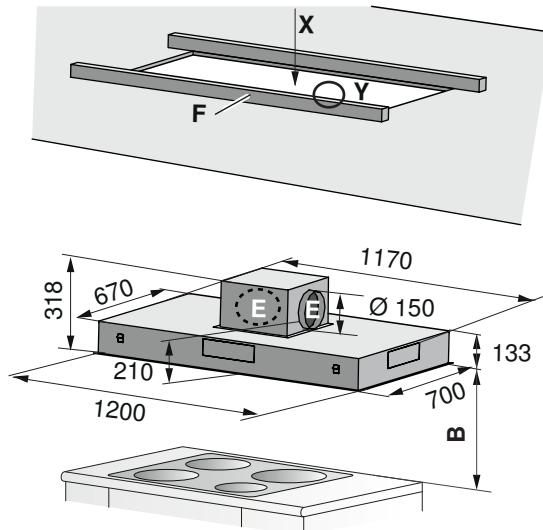

13.2 Ceiling range hoods

Applicable to the following hoods:

- For activation of external motor flaps, roof ventilators, room fans, etc., see document P60.008.
- Mains connection directly above range hood, connection cable 1.2 m with plug.

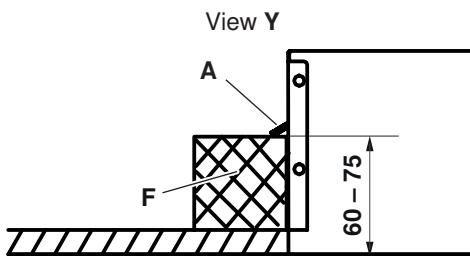

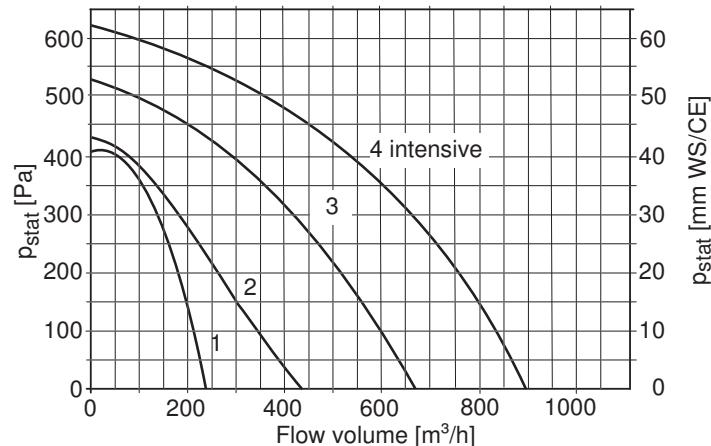

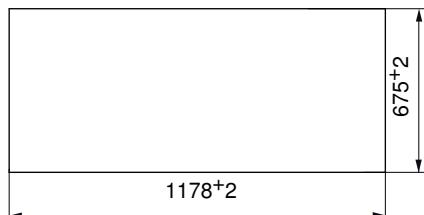

DSDSR12 (64003)

Operating mode	Extraction/re-circulation	Mains connection	220-240 V~ 50/60 Hz, 284 W	Illumination	3x7 W	Fan speeds	4
Noise level	43-74 dB(A)	Fuse	10 A	Motor	1x270 W	Weight	~33 kg

Rotatable motor housing **E** and mountable on all four sides

Cut-out measurements view **X**

F Wooden strip

Distance above hob

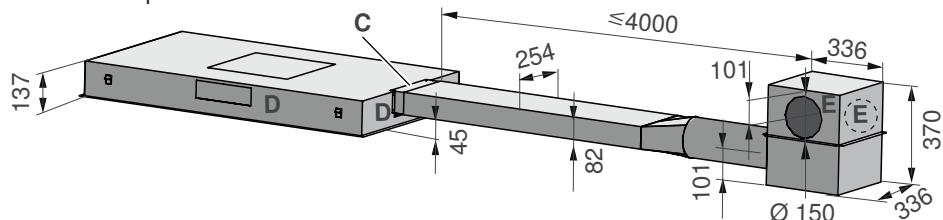

Minimum distance **B**: 800 mm

Recommended maximum distance **B**: 1300 mm

Installation with external motor housing with side outlet

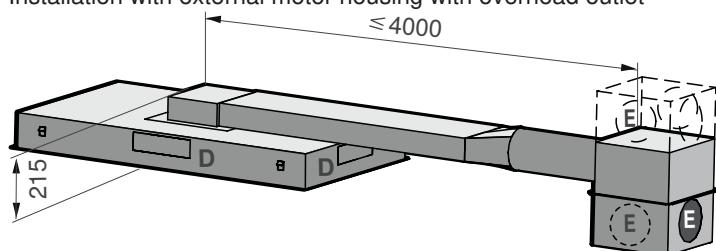

Necessary accessories: Installation set for external motor housing H43403 (inclusive transition piece **C** for V-ZUG flat channel)

Extraction **D** possible on all four sides

Outlet **E** selectable for all four sides

Installation with external motor housing with overhead outlet

13.3 Island hoods

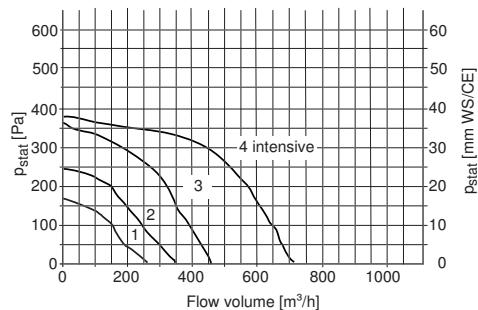

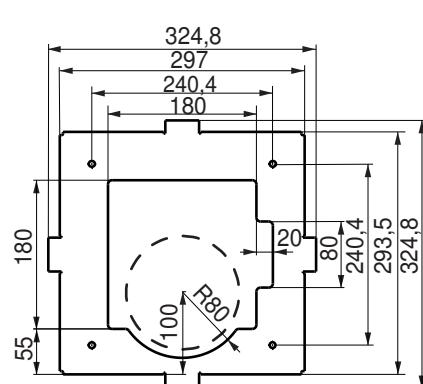

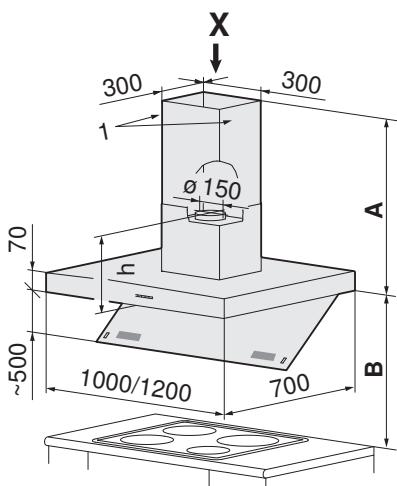

Applicable to the following hoods:

- Telescopic casing (adjustable) is supplied in up to 4 basic heights **A**.
- For activation of external motor flaps, roof ventilators, room fans, etc., see document P60.008.
- Mains connection directly above range hood, connection cable 1.2 m with plug.

DI-Premira DIPQG10 (63004), DIPQG12 (63005)

Operating mode	Extraction/recirculation	Mains connection	220-240 V~ 50/60 Hz, 138.8 W	Illumination	4 × 2.2 W	Fan speeds	4
Noise level	41-64 dB(A)	Fuse	10 A	Motor	1 × 130 W	Weight	~31.5/35 kg
Options connection (optional)			Max. 300 W

Positions of electrical connections

The specified dimensions are valid for straight exhaust air piping. If exhaust air piping with an elbow are used, the dimensions must be adapted accordingly.

Appliance	Connection from floor (plinth height 100 mm)	Connection in niche (from centre to connection)	Type of connection
All models	2050 mm	180 mm	Flush power socket 230 V

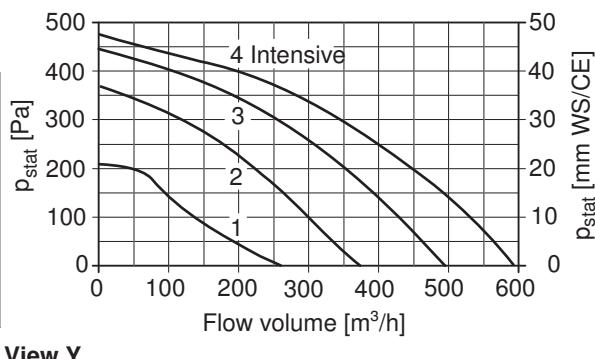

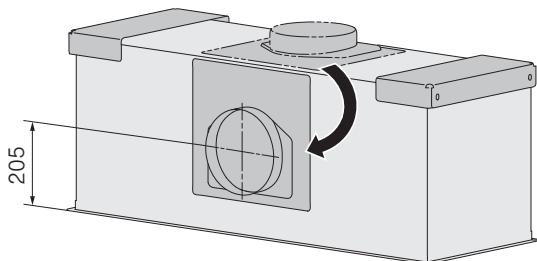

**DHL8 (64001), DHL11 (64002)**

Operating mode	Extraction/ recirculation	Mains connection	220-240 V~ 50/60 Hz, 200 W	Illumination	4 × 3 W	Fan speeds	4
Noise level	40-61 dB(A)	Fuse	10 A	Motor	188 W	Weight	~22.5/30.5 kg

**Cut-out for wall unit (view X)**¹ Cut-out measurements**Distance above hob**Minimum distance **B**

For electric hob: 500 mm

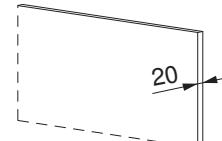

For gas hob: 750 mm

**View Y**

The range hood can be converted so that the exhaust air connection is at the back of the appliance.

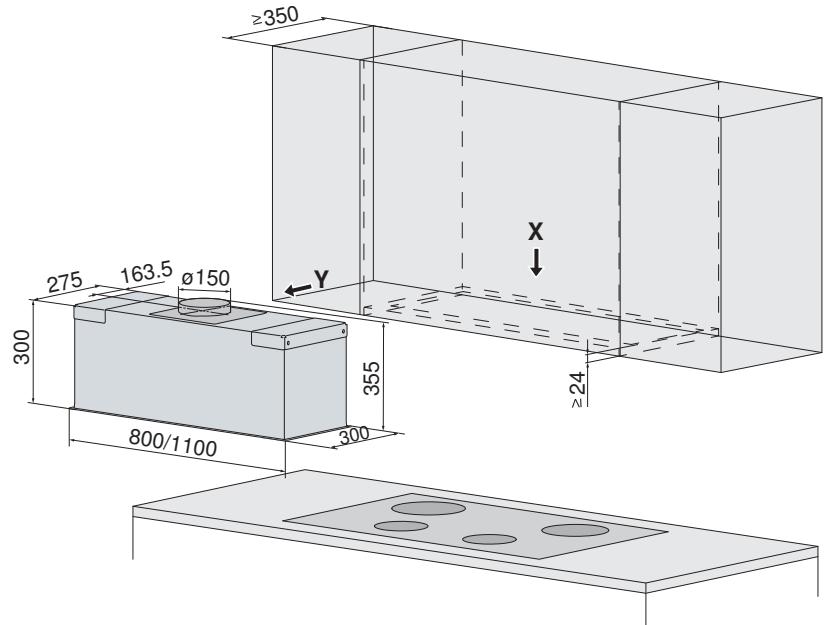

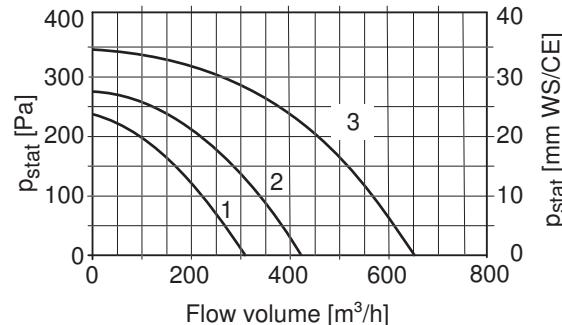

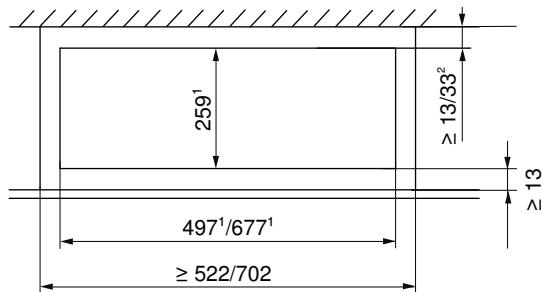

Use of stone cladding

20 mm thick wall panels (granite, marble) are possible.

DEHE5 (61021), DEHE7 (61022)

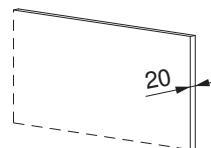

Operating mode	Extraction/ recirculation	Mains connection	220-240 V~ 50/60 Hz, 245 W	Illumination	2 × 20 W	Fan speeds	4
Noise level	69 dB(A)	Fuse	10 A	Motor	205 W	Weight	5/6 kg

**Cut-out for wall unit (view X)****Distance above hob**

Minimum distance **B**
For electric hob: 650 mm
For gas hob: 650 mm

² **Use of stone cladding**

20 mm thick wall panels (granite, marble) are possible.

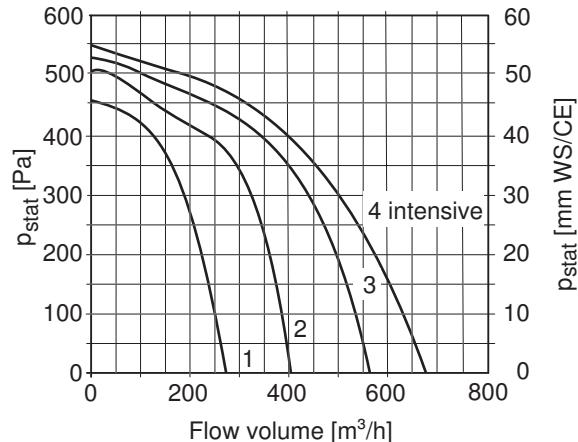

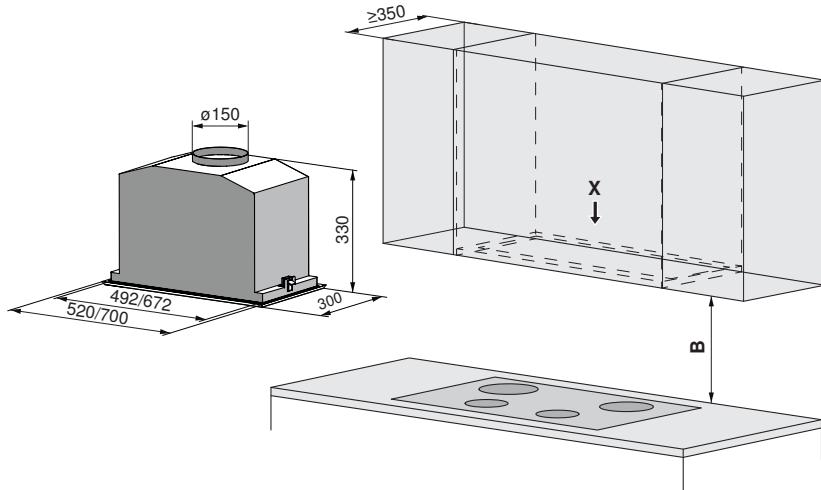

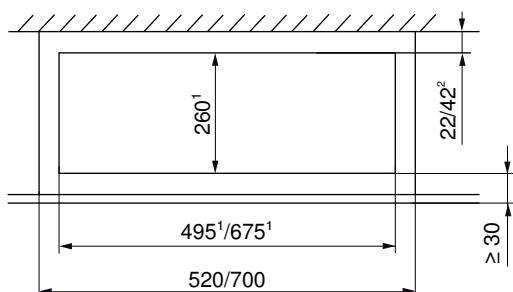

¹ Cut-out measurements

**DEHMR5 (61023), DEHMR7 (61024)**

Operating mode Extraction/recirculation **Mains connection** 220-240 V~ 50/60 Hz, 267.2 W
Noise level 56-72 dB(A) **Fuse** 10 A

Illumination 2x1.1 W **Fan speeds** 4

Motor 256 W **Weight** 7/8 kg

**Cut-out for wall unit (view X)**

14 Refrigerators

14.1 General notes

Insufficient ventilation can cause a malfunction and shorten the life of the appliance.

Heavy door panel weights shorten the service life of the door hinges.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

In an open-plan kitchen and living room, a raised noise level can be expected if the ventilation slits face into the room.

14.2 Electrical connection data

Appliance	Climate class	Mains connection	Fuse	Mains cable
Refrigerators				
Cooltronic 60i	SN-ST	230 V~ 50 Hz	10 A	2.2 m, with plug
Noblesse 60i				
Prestige P 60i eco	SN-T			
Prestige 60i eco				
De Luxe 60i eco	SN-ST			
Futura 60i eco				
Futura 60i	SN-ST			
Royal 60i				
Prestige 60i	SN-T	230 V~ 50 Hz	10 A	2.5 m, with plug
De Luxe 60i				
Magnum 60i eco	N-ST			
Komfort 60i				
Winecoolers				
Winecooler SL 60	SN-ST	230 V~ 50 Hz	10 A	2.1 m, with plug

14.3 Ambient conditions

Condensate may form in the appliance in tropical conditions

and this has to be taken into account in the planning.

Climate class	Minimum	Maximum
SN	+10 °C	+32 °C
N	+16 °C	+32 °C
ST	+16 °C	+38 °C
T	+16 °C	+43 °C

Ventilation

200 cm² above and below

14.4 Niche ventilation

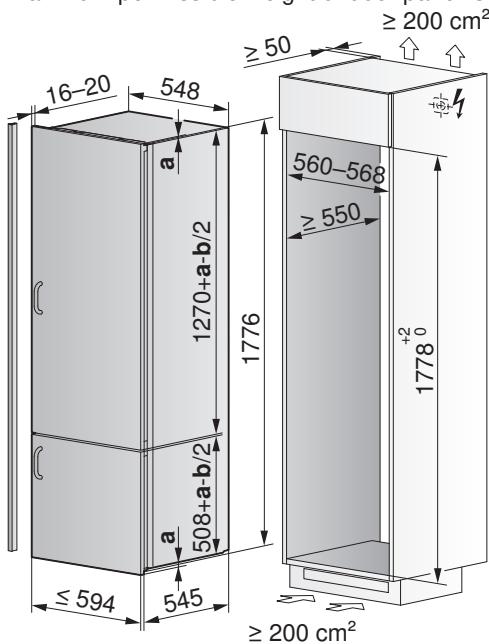

Shadow gaps for air circulation – even if extending over the width of several units – are insufficient.

14.5 Refrigerators

Cooltronic 60i (51029)

KC 60i (integrable in niche height 1778 mm)

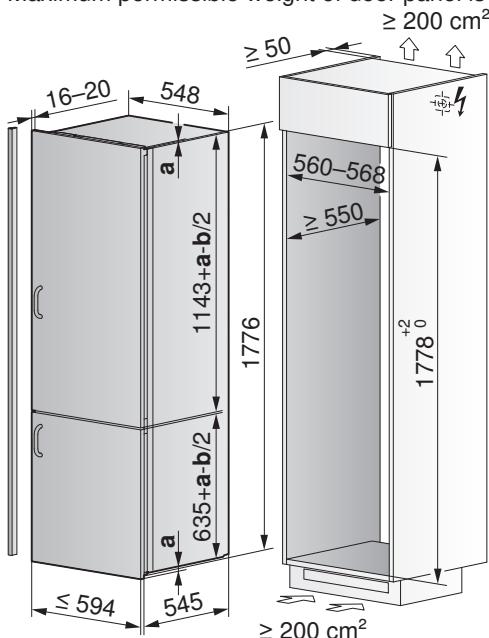

Maximum permissible weight of door panel is 17.5 kg

Prestige P 60i eco (51052), Prestige 60i eco (51045), Prestige 60i (51027)

KPRP 60i eco, KPR 60i eco, KPR 60i (integrable in niche height 1778 mm)

Maximum permissible weight of door panel is 17.5 kg

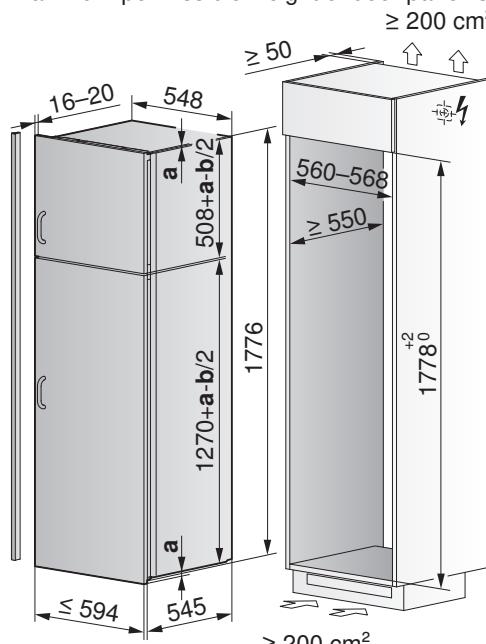

a Niche overlap
b Gap (≥ 4 mm)

Noblesse 60i (51028)

KN 60i (integrable in niche height 1778 mm)

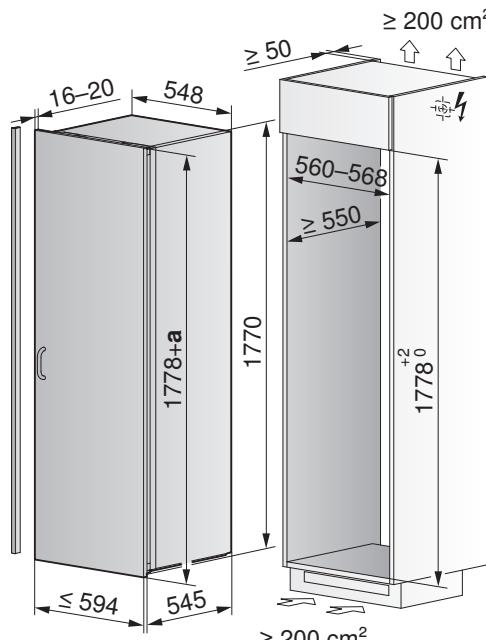

Maximum permissible weight of door panel is 17.5 kg

Magnum 60i eco (51031)

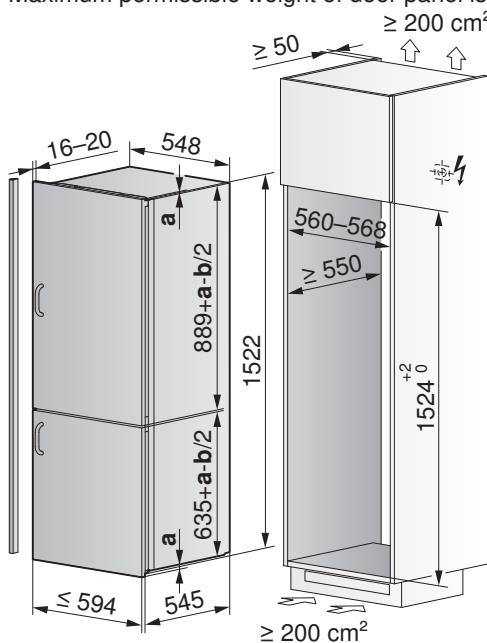

KM 60i eco (integrable in niche height 1778 mm)

Maximum permissible weight of door panel is 25 kg

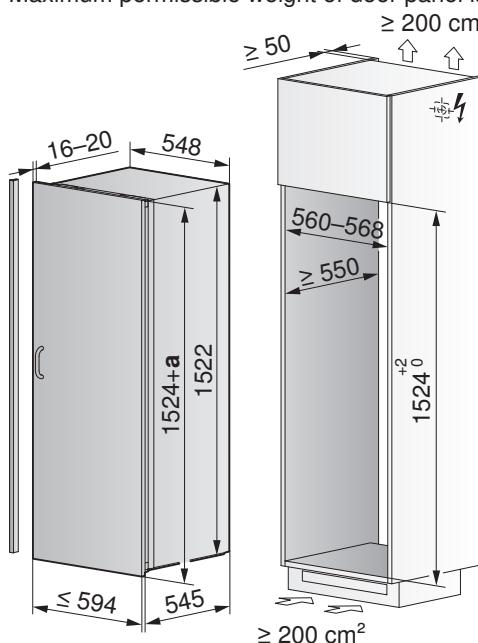

Futura 60i eco (51061), Futura 60i (51020)

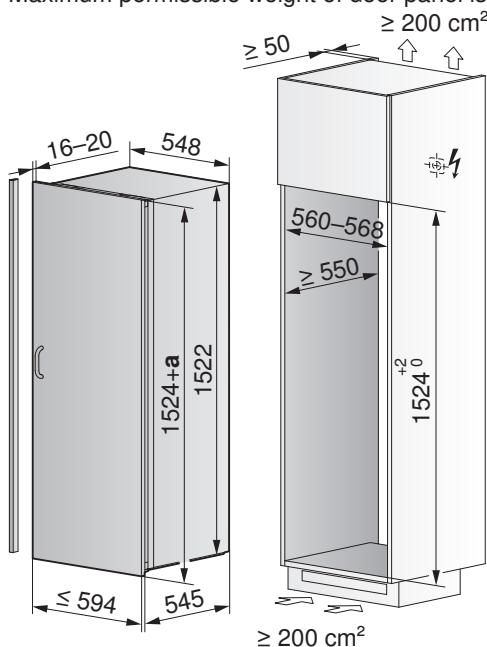

KF 60i eco, KF 60i (integrable in niche height 1524 mm)
Maximum permissible weight of door panel is 17.5 kg

**Royal 60i (51018)**

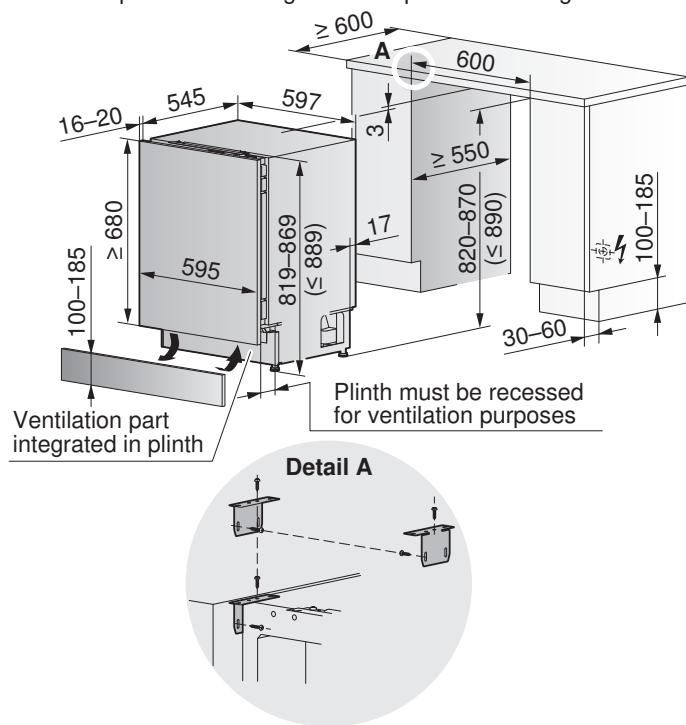

KR 60i (integrable in niche height 1524 mm)
Maximum permissible weight of door panel is 17.5 kg

**De Luxe 60i eco (51060), De Luxe 60i (51064)**

KL 60i eco, KL 60i (integrable in niche height 1524 mm)
Maximum permissible weight of door panel is 17.5 kg

**Komfort 60i (51048)**

KK 60i (integrable in niche height 820–870 mm)
Maximum permissible weight of door panel is 17.5 kg

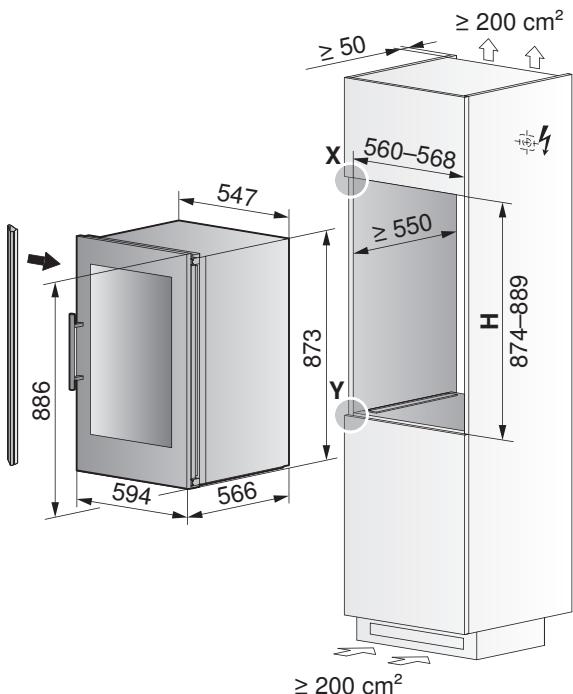

- a Niche overlap
- b Gap (≥ 4 mm)

Installation set for stone cladding is enclosed: H72998

14.6 Winecoolers

Winecooler SL 60 (629)

KWSL60

Detail X

Detail Y

Niche height H	Installation kit art. no.	Installation kit height	Overlap	
			U ¹	U ²
874-877	-	-	6 mm	3-6 mm
877-880	H72435	3 mm	3 mm	3-6 mm

15 Dishwashers

Dishwashers with heat pump (see page 112)

15.1 General notes

 Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

 At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

 For work surfaces that are susceptible to moisture, use work surface protection W70163.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2000 m above sea level.

15.2 Electrical connection data / plumbing in

	Designation	Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket
B	cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Drain, outlet	400 mm	L = 110 mm	ø 56 mm
G1	Dishwasher in base unit		Connection in adjacent compartment left and right	
G2	Dishwasher in tall unit		Connection in max. 2 compartments left and right	

* Water connection at >60 °C is not recommended

Electrical connection data

Appliance	Country group *	Mains connection	Rated load	Fuse	Mains cable
Adora SL (41005-41008, 41042, 41043)	A, C, E	230 V~ 50 Hz	3200 W	16 A	1.5 m, with plug
	B		2200 W	10 A	
	D	220-240 V~ 50 Hz	2200 W		
	F		3200 W	16 A	
Adora S (41016, 41034, 41036)	A, B, C, D, E, F	230 V~ 50 Hz	2200 W	10 A	
Adora N (41011, 41029, 41030-41033)					

* Key (see page 2)

Plumbing-in data

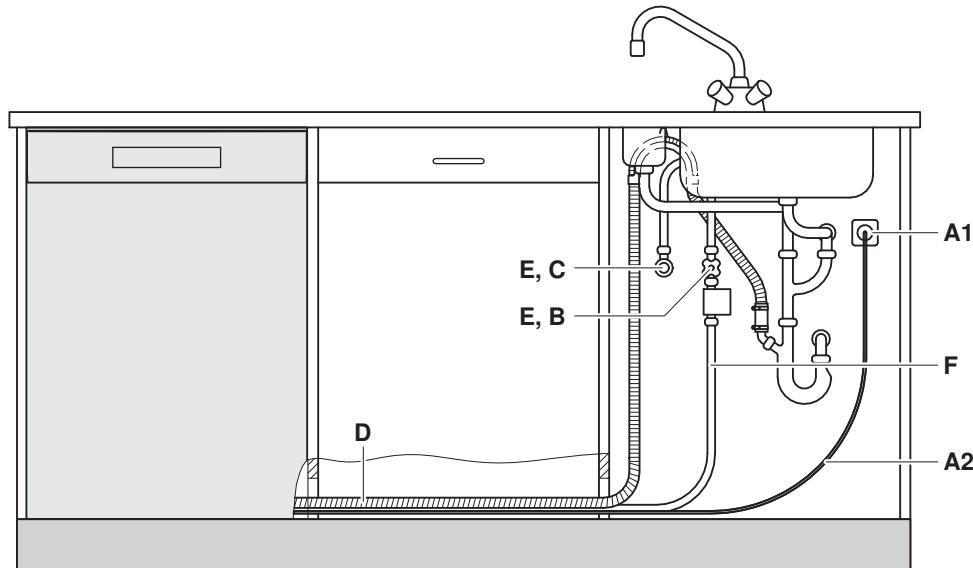

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature	Cold water	–	5 °C	35 °C
	Hot water	–	40 °C	60 °C

If the water pressure is too high, a pressure reducer valve must be fitted.

Connection example

	Designation	Adora dishwasher
A1	Power socket	Yes
A2	Connection cable	Length 1.50 m
B	Cold water connection	Yes
C	Hot water connection	Yes
D	Drain hose	Length 1.55 m Internal diameter = 22 mm
E	Shut-off devices	Yes
F	Aqua-stop / water inlet with filter, G ^{3/4} "	Length 1.55 m

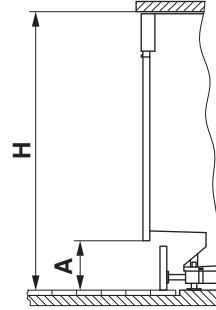

15.3 Installation overview

Depending on niche height **H**, either standard or extra height appliances or only one of the two can be installed.

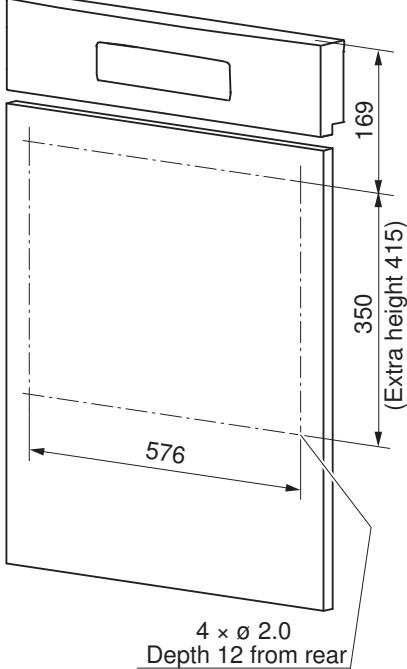

Dimension A in mm	Niche height H in mm

15.4 Drilling plans for decor panel 60 cm

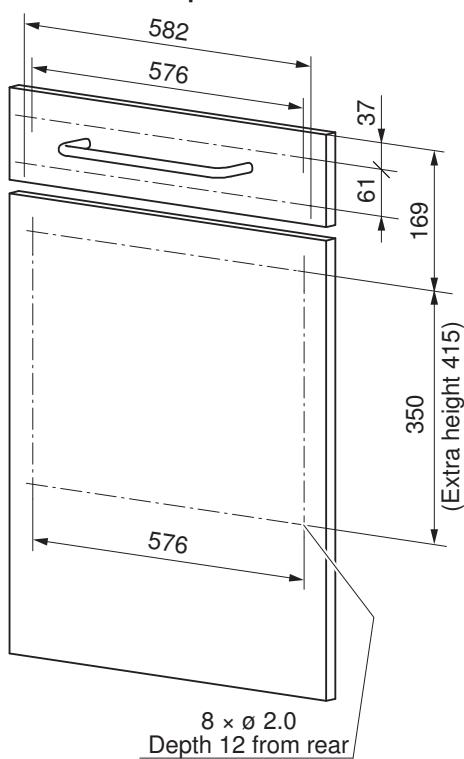

Integrated

Fully integrated

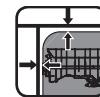

Two-part

15.5 Adora SL, S, N with niche width 60 cm

It must be ensured air gap remains in the shadow gap.

Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).

The permissible weights of the front panel / decor system **1** depend on the design variant:

	Integrated Nero, white	Integrated ChromeClass	Design integrated Mirror glass	Fully integrated
Maximum weight	8 kg	7 kg	6.5 kg	7 kg
Minimum weight	5.5 kg	4.5 kg	4 kg	5 kg

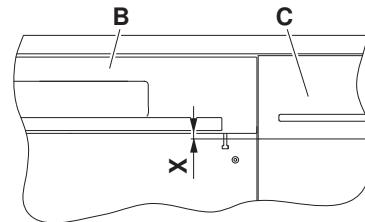

- Front panel / decor system (wood) **1** fully integrated must be cut to the necessary dimensions.

For stronger springs, see Accessories (see page 119)

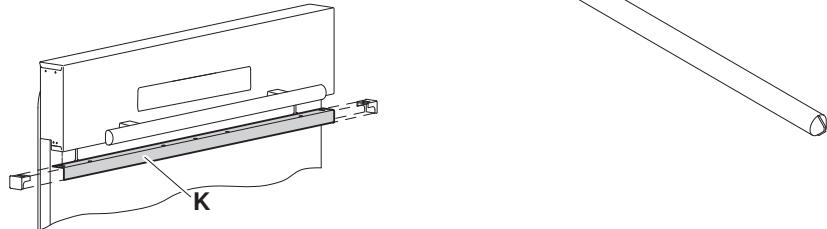

Compensator for ChromeClass and mirror glass

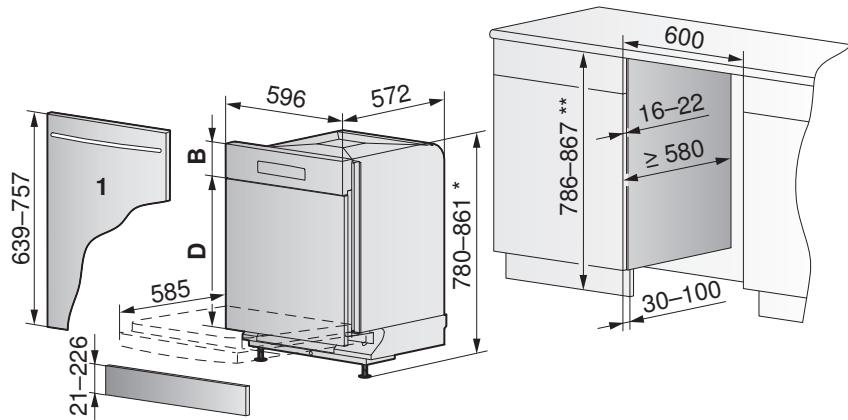

Compensator set: see Accessories Accessories (see page 119)

If the bottom edge of the operating panel **B** is not at the same height **X** as the bottom edge of the adjacent kitchen drawer **C**, a levelling piece (compensator **K**) must be mounted (see Installation instructions J182.51).

Compensators contained in the set:
8 mm, 12 mm, 16 mm

Base unit «standard»

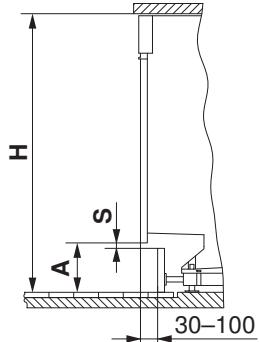

* Up to max. 896 with a second runner only,
can be ordered under W82930

** Up to max. 902 with a second runner only,
can be ordered under W82930

	Nero, white	ChromeClass	Mirror glass
Operating panel B incl. compensator	124-146 mm	124-140 mm	124-140 mm

16 Dishwashers with heat pump

16.1 General notes

 Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

 At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

 For work surfaces that are susceptible to moisture, use work surface protection W70163.

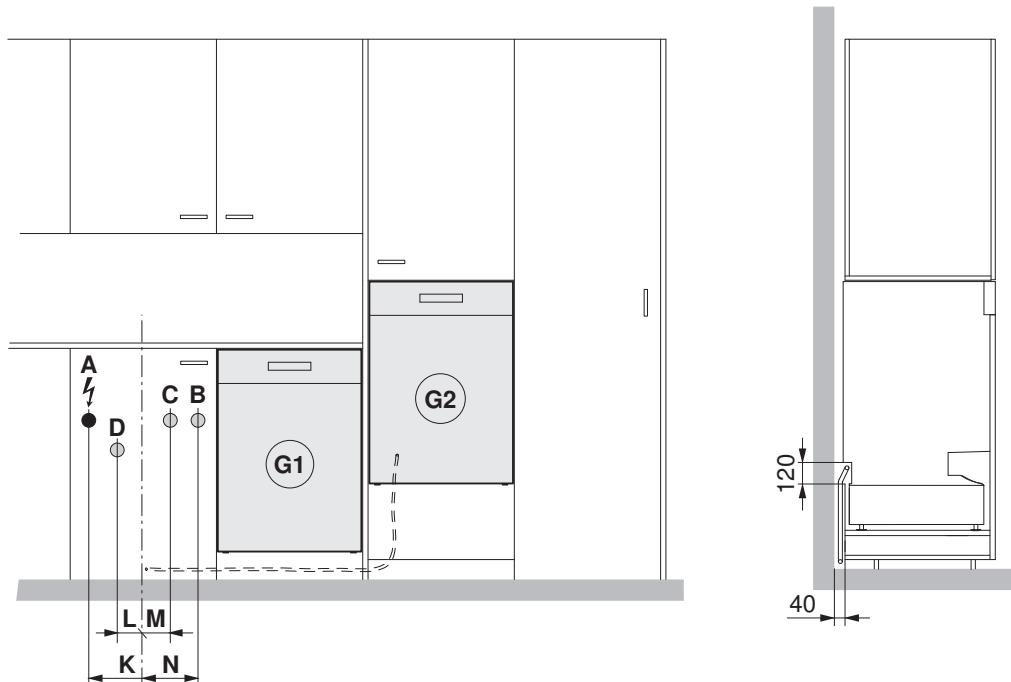

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2000 m above sea level.

16.2 Electrical connection data / plumbing in

	Designation	Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket
B	cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Drain, outlet	400 mm	L = 110 mm	Ø 56 mm
G1	Dishwasher in base unit		Connection in adjacent compartment left and right	
G2	Dishwasher in tall unit		Connection in max. 2 compartments left and right	

* Water connection at >60 °C is not recommended

Electrical connection data

Appliance	Country group *	Mains connection	Rated load	Fuse	Mains cable
Adora SL WP (41009, 41038)	A, C, E	230 V~ 50 Hz	3200 W	16 A	1.5 m, with plug
	B		2200 W	10 A	
	D	220-240 V~ 50 Hz	2200 W		
	F		3200 W	16 A	

* Key (see page 2)

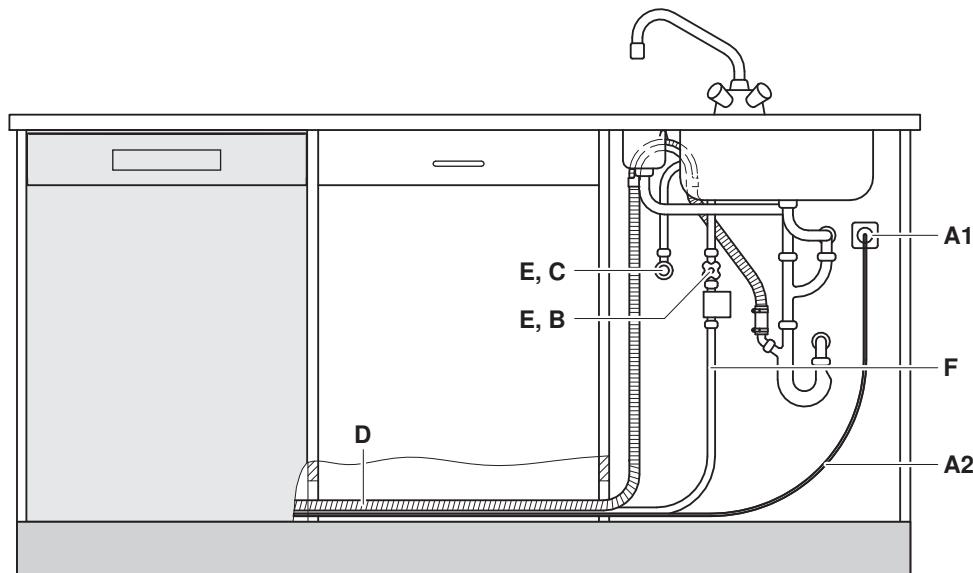

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature		–	5 °C	60 °C

Connection example

	Designation	Adora dishwasher
A1	Power socket	Yes
A2	Connection cable	Length 1.50 m
B	Cold water connection	Yes
C	Hot water connection	Yes
D	Drain hose	Length 1.55 m Internal diameter = 22 mm
E	Shut-off devices	Yes, ¾"
F	Aqua-stop / water inlet with filter, G¾"	Length 1.55 m

See Accessories (see page 135) for special connection lengths.

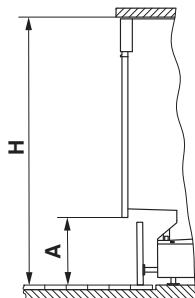

16.3 Installation summary

Keep base compartment unobstructed, appliance stands on the floor.

Size of base gap **S**.

	Niche height H in mm				
Dimension A in mm	870	880	890	900	910
200	S

120	S	S			
110	S				
105	S				

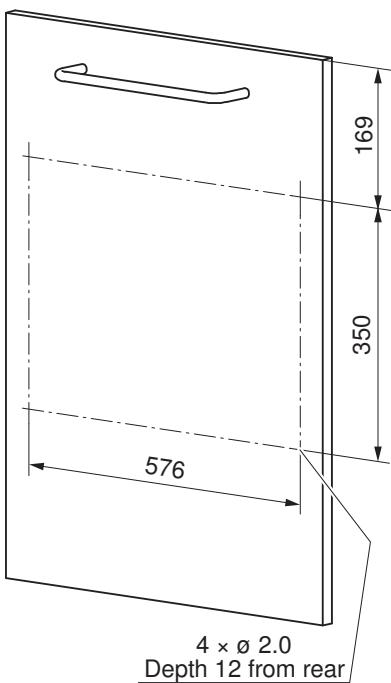

Standard without cabinet plinth

16.4 Drilling plans for decor panel 60 cm

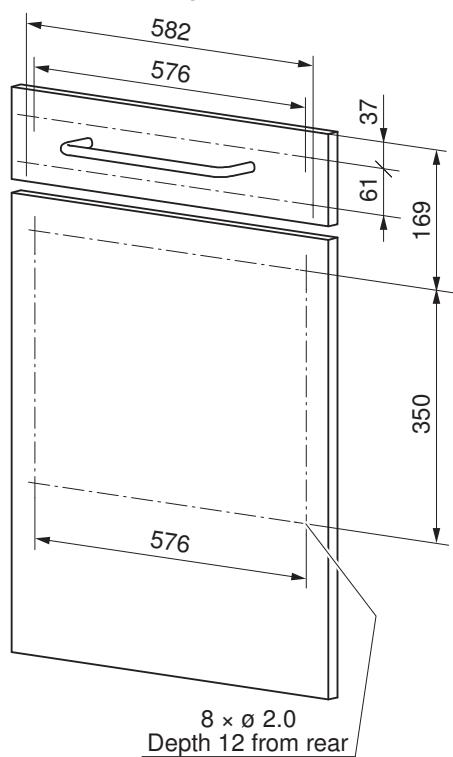

Integrated

Fully integrated

Two-part

16.5 Adora SL WP with niche width 60 cm

It must be ensured air gap remains in the shadow gap.

Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).

At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

The permissible weights of the front panel / decor system **1** depend on the design variant:

	Integrated Nero, white	Integrated ChromeClass	Design integrated Mirror glass	Fully integrated
Maximum weight	8 kg	7 kg	6.5 kg	7 kg
Minimum weight	5.5 kg	4.5 kg	4 kg	5 kg

- Front panel / decor system (wood) **1** fully integrated must be cut to the necessary dimensions.

Compensator for ChromeClass and mirror glass

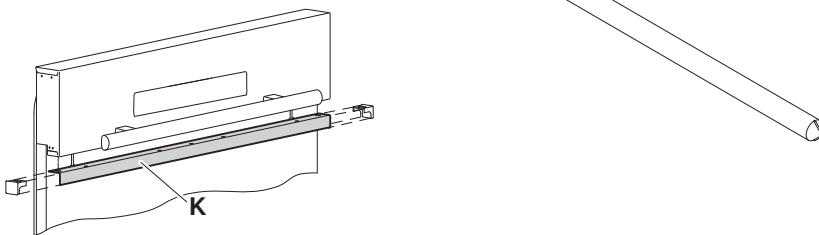

Compensator set: See Accessories Dishwashers (see page 135)

If the bottom edge of the operating panel **B** is not at the same height **X** as the bottom edge of the adjacent kitchen drawer **C**, a levelling piece (compensator **K**) must be mounted (see Installation instructions J182.51).

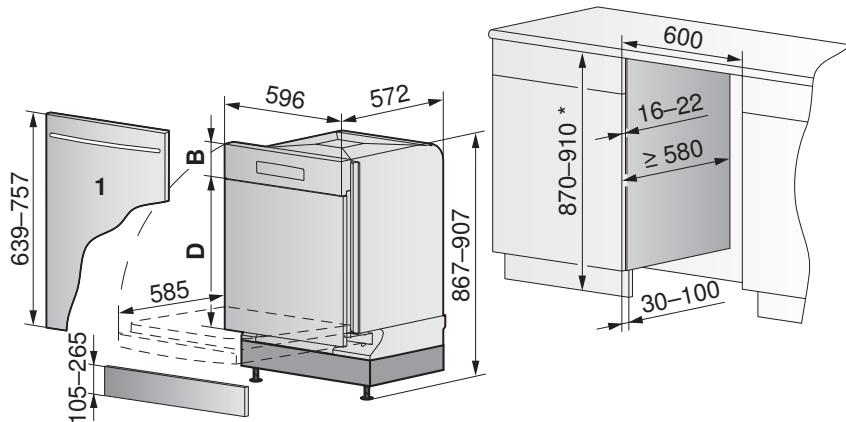

Compensators contained in the set:

8 mm, 12 mm, 16 mm

For stronger springs, see Accessories (see page 119)

Base element

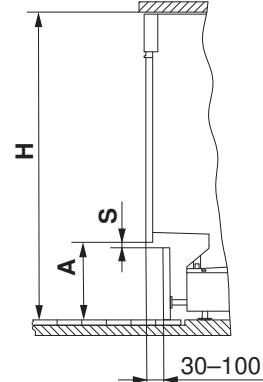

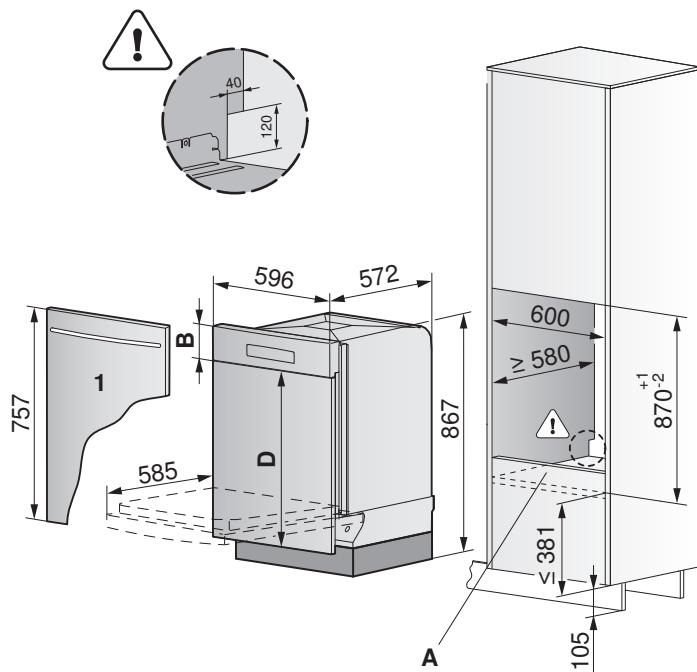

* If the niche height is greater than 910 mm, a plate must be placed underneath the appliance or an extra-long decor panel must be used.

	Mirror glass	Fully integrated
Operating panel B incl. compensator	124-140 mm	-
Decor panel D	496-632 mm	639-757

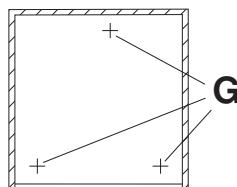

Size of base gap **S**.

Dimension A in mm	Niche height H in mm					Min. S in mm

17 Accessories

17.1 Control set option (current sensor module with relay module)

The control set option serves to control external devices (such as a fan) by a control signal generated by a V-ZUG appliance. The electrical properties of both component parts must be known for an effective interface. This requires special clarification and assumes electrotechnical expertise. Planning and installation must therefore only be carried out by an electrotechnical expert.

For 230 V~/max. 16 A:

Control set option SSM230

comprised of:

- 1 current sensor module cpl. SSM1
- 1 relay module cpl. RM

Article no.

P60036

For 400 V 3N~/max. 25 A:

Control set option SSM400

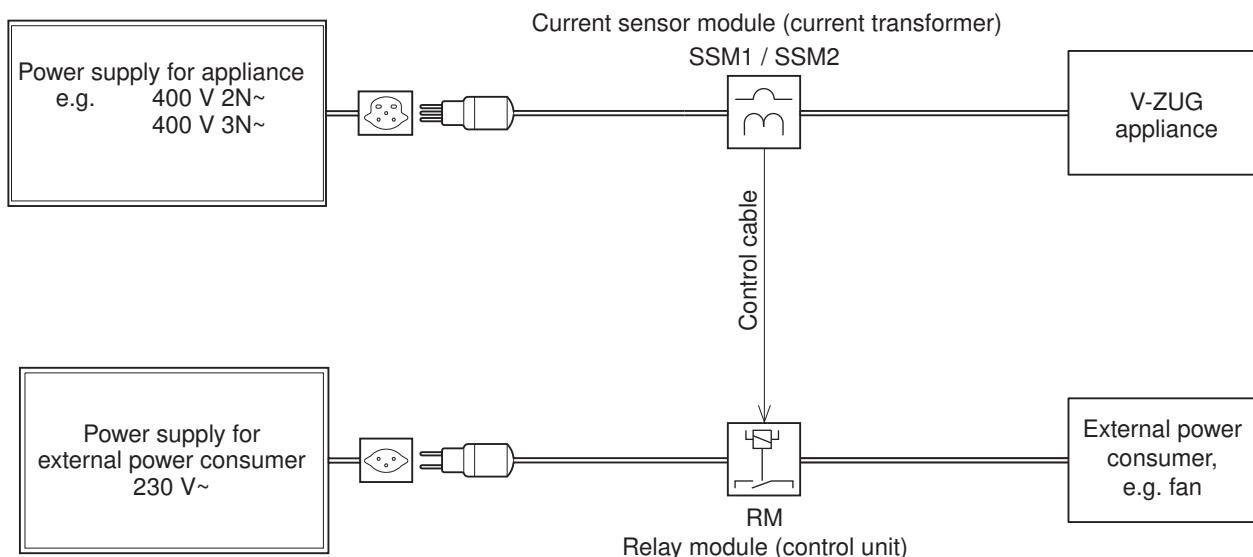

comprised of:

- 1 current sensor module cpl. SSM2
- 1 relay module cpl. RM

Article no.

P60037

The example connection below shows a standard situation. For detailed planning, refer to document P60.008 which can be obtained from the Head Office in Zug, Tel. + 41 58 767 67 67, or on the Internet from www.vzug.ch.

17.2 Cookers / ovens / steam cookers / microwaves / coffee machines / warming & systems drawers

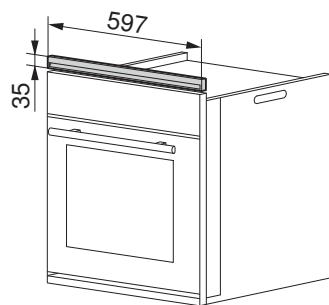

Compensation elements

Ventilation grille

- Ventilation grilles are needed when glass ceramic hobs are installed over ovens.
- For installation, see installation instructions J402.54.

Mounting angle for combination possibilities

- For installation, see installation instructions J21021.050
 - ▶ In the niche mount to the wood left and right.
 - ▶ The appliance is placed on the mounting angle and pushed into the niche.

Art. no. K50572, construction type EURO

Design cover

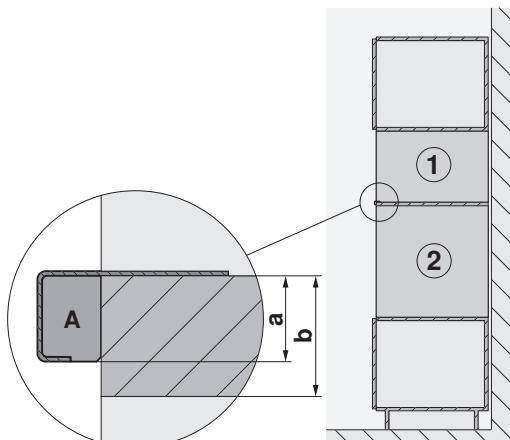

The design cover covers the intermediate base for EURO niches and is for a combined installation of two appliances e.g. oven 1 and combi-steam 2. The cover is dimensioned for panel overlapping of 4 mm.

- For installation, see installation instructions J340.050.
- Depending on the thickness of the intermediate base **b**, two variants (nero) of the design cover **A** are available:

Article no.

K37158 (**b** = 16 mm / **a** = 10.5 mm)

K37159 (**b** = 19 mm / **a** = 13.5 mm)

Mastic set for flush installation		
Mastic set	86392885	J004.130

Suitable for all absorbent worktop materials (wood and natural stones such as marble, granite).

The set comprises:

Designation	Remarks	Number
Cleaning agent, type T *	—	1
Special primer, type 1105 *	100 ml bottle	1
Silicon adhesive, black	cartridge with nozzle	1

For the remaining or for non-absorbent worktop materials and artificial stone surfaces, the special primer type 107 *, article no. 45.2771.76, must be used. Not suitable for polyethylene, polypropylene or Teflon.

* Primer types: Firm name H. OTTO GmbH u. Co., Chemie GK, D-83413 Fridolfing

Good adhesion cannot be obtained on slate or other materials containing oil. The use of such worktop materials is not advised for the flush installation of glass ceramic hobs.

In case of doubt as to the suitability of mastic set materials, especially when using them for the first time, we recommend that you carry out adhesion trials on test pieces or at non-visible locations.

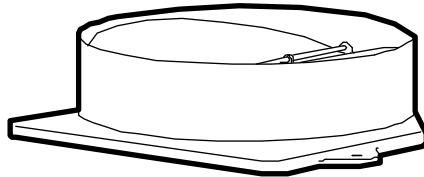

17.4 Range hoods

Technical information on the range hoods can be found in the document J328.36 «TechInfo for range hoods» and the price list.

Short exhaust air connection

The exhaust air connection is used for exceptionally low installation heights, e.g. in older properties. Depending on how it is installed, the air resistance can be 30-40 % higher than with the proposed exhaust air connection. This must be taken into account in the dimensioning of the exhaust air piping.

Article no.

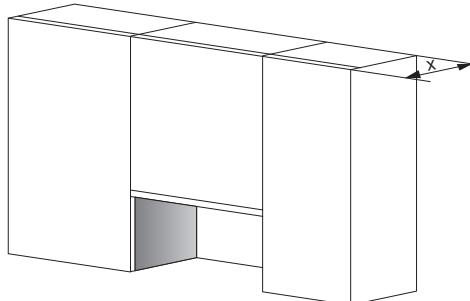

H41877 (\varnothing 150 mm)

The exhaust air connection can be used for the following models:

- DF-E5, DF-E6
- DF-SG5, DF-SG6, DF-SG8, DF-SG9
- DF-SLG5, DF-SLG6, DF-SLG8, DF-SLG9
